

COOMET DIRECTORY 2016

(as of 31st of March, 2016)

MOSCOW

This edition of the COOMET Directory was prepared by the acting COOMET Secretariat and published in two versions, Russian and English, the official languages of COOMET documents. The information about metrology infrastructures in the COOMET Member Countries was updated and kindly provided to the COOMET Secretariat by these countries.

Your questions or remarks concerning the material given in the Directory are welcome to coomet@vniims.ru

The electronic version of the COOMET Directory is available on the COOMET web-portal at www.coomet.net and COOMET website at www.coomet.org.

COOMET is a regional organisation originally establishing cooperation of national metrology institutions of the countries of Central and Eastern Europe. It was founded in June, 1991 and renamed in **Euro-Asian Cooperation of National Metrological Institutions** in May, 2000. COOMET is open for any metrology institutions from other regions to join as associate members.

Now the members of COOMET are metrology institutions from **Armenia, Azerbaijan, Belarus, Bosnia and Herzegovina** (Associate Member), **Bulgaria, Georgia, Germany** (Associate Member), **Kazakhstan, Kyrgyzstan, DPR of Korea** (Associate Member), **Cuba** (Associate Member), **Lithuania, Moldova, Russia, Romania, Slovakia, Tajikistan, Turkey** (Associate Member), **Uzbekistan** and **Ukraine**.

The basic activity of COOMET is cooperation in the following areas: measurement standards of physical quantities, legal metrology, quality management systems, information and training.

The objectives of COOMET are as follows:

- assistance in effectively addressing the problems relating to uniformity of measures, uniformity of measurements and the required accuracy of their results;
- assistance in promoting cooperation of national economies and eliminating technical barriers in international trade;
- harmonisation of activities of metrology services of Euro-Asian countries with similar activities in other regions.

COOMET strictly adheres to **the Memorandum of Understanding (MoU)** and **Rules of Procedure** in any of its activities.

COOMET countries cooperate in the following subject fields: acoustics, ultrasound, vibration; electricity and magnetism; flow measurement; ionising radiation and radioactivity; length and angle; mass and related quantities; photometry and radiometry; physical chemistry; thermometry and thermal physics; time and frequency; reference materials; general questions concerning measurements (general metrology); legal metrology; quality management systems;

information and information technology; training and raising proficiency level of experts.

The supreme body of COOMET is **the COOMET Committee** consisting of heads of national metrology institutions from COOMET Member Countries. The Committee organises and promotes cooperation. The Committee meets at least once a year.

The COOMET President is elected by the Committee from among its Members for a three year period with an option of one more term of office. The President provides **the COOMET Secretariat** by using resources of his/her own institution.

The President proposes candidates of **COOMET Vice-Presidents** from among the Members of the Committee for further approval by the Committee. The President, Vice-Presidents and Head of the COOMET Secretariat constitute **the COOMET President's Council**, which decides upon the COOMET policy, interacts with international and regional metrology organisations, coordinates cooperation in the period between the Committee meetings and distinguishes problems to be discussed at these meetings.

Organisation of work in the basic fields and directions of cooperation is the major task of **the Structural Bodies of COOMET (the Joint Committee, Technical Committees, and Quality Forum)**.

The Committee Members appoint their representatives to the Structural Bodies of COOMET (**Correspondents**) from among candidates in their countries. The Correspondents propose a candidate for the position of **the Chairperson of a Structural Body** for its further approval by the COOMET Committee.

The Structural Bodies can establish **Subcommittees (SCs)** for working on routine tasks of cooperation and **Working Groups (WGs)** within corresponding SCs/TCs for carrying out specific work on COOMET projects.

The official languages for the COOMET meetings and documents are **Russian** and **English**.

COOMET has no financial assets of its own.

By its scope of cooperation COOMET belongs to organisations of a multi-purpose type.

The activities of COOMET are carried out in line with ***the Conception of Cooperation and Related Activities of COOMET approved in 2005 and COOMET Development Programmes*** for a period of two or three years approved by the COOMET Committee.

An important prerequisite of COOMET effectiveness is the collaboration in all fields of activities. Jointly realised projects are the core elements of ***the COOMET Working Programme***.

Nowadays the main attention is paid to the cooperation in the field of measurement standards, in particular to the implementation of the CIPM Arrangement on Mutual Recognition of National Measurement Standards and Calibration and Measurement Certificates Issued by National Metrology Institutes (CIPM MRA). Therefore, the majority of the COOMET projects are dedicated to the preparation of information on calibration and measurement capabilities (CMC), participation in key comparisons of national measurement standards organised by CIPM and organisation of regional comparisons of measurement standards, as well as creation and implementation of Quality Management Systems of the National Metrology Institutes of COOMET Member Countries.

The subjects of cooperation of COOMET Member Countries in the field of legal metrology encompasses a broad range of problems, starting with harmonisation of the national requirements in the area of legal metrology in the Member Countries and finishing with such applied problems as testing of software for measuring instruments, control of prepackages.

COOMET activities in the field of information support and training are also substantially related to the implementation of the CIPM MRA (e.g. in developing software for the CMC database and comparisons of measurement standards of the NMIs of COOMET Member Countries). It is also aimed at

the exchange of training programmes for experts in the area of metrology, development of exchange programmes for experts in COOMET countries, determination of criteria for assessing scientific papers of young metrologists, etc.

COOMET is a member of the Joint Committee of the Regional Metrology Organisations and the BIPM (JCRB), as well as keeps close relations with OIML according to the Agreement with the International Bureau of Legal Metrology (BIML) signed in 1993.

Based on mutual interests, COOMET also cooperates with Regional Metrology Organisations such as

- European Association of National Metrology Institutes (EURAMET),
- European Cooperation in Legal Metrology (WELMEC),
- European Cooperation for Accreditation (EA),
- Asia-Pacific Metrology Programme (APMP),
- Asia-Pacific Legal Metrology Forum (APLMF),
- Asia Pacific Laboratory Accreditation Cooperation (APLAC),
- National Conference of Standards Laboratories International (NCSLI),
- Scientific & Technical Commission on Metrology (STCMetr) of Euro Asian Council for Standardization, Metrology and Certification (EASC),
- Intra-African Metrology System (AFRIMETS),
- Inter-American Metrology System (SIM), etc.

COOMET is a joint forum of metrologists of Euro-Asian region, effectively working regional metrology organisation which successfully fulfils its tasks according to approved long term programmes. Cooperation within COOMET and its results allow its Member Countries to successfully solve metrological issues the national economies face under the conditions of market globalisation.

MEMORANDUM OF UNDERSTANDING

The National Metrology Institutions on behalf of which this Memorandum has been signed

considering

- the territorial proximity of the Countries and their mutual economic relations;
- the need to permanently improve metrological services for the benefit of economic and scientific relations;
- the similarity of their structures and the operational principles of their National Metrology Services;
- their combined experience and the results of their previous bilateral and multilateral cooperation;
- their willingness to more closely cooperate with international and regional metrology organisations

declare their intention to cooperate in the field of measurement standards of physical units, calibration, legal metrology, quality management systems, information technology and training in the field of metrology within the COOMET organisation given below.

SECTION 1 – COOMET MEMBERS

COOMET is an organisation for the Euro-Asian cooperation of National Metrology Institutions (from the countries of Central and Eastern Europe, Asia and nearby countries) and is open to the National Metrology Institutions of countries from other regions to join it.

SECTION 2 – COOMET OBJECTIVES

The objectives of COOMET are as follows:

1. To contribute to effectively solving problems of the uniformity of measures, uniformity and required accuracy of measurements.
2. To contribute to establishing closer cooperation between the national economies and removing technical barriers to international trade.
3. To harmonise the activities of Metrology Services on the basis of international arrangements.

SECTION 3 – COOMET TASKS

The tasks of COOMET are to strengthen the links between the National Metrology Institutions interested in solving common problems and to create effective mechanisms in order to:

- achieve compatibility of measurement standards and harmonise the requirements imposed on measuring instruments and methods for their metrological control;
- recognise the equivalence of national certificates authenticating the results of metrological activities;
- exchange information on the current status of National Metrology Services and their development;
- collaborate in developing metrological projects;
- promote the exchange of metrological services.

MEMORANDUM OF UNDERSTANDING

SECTION 4 – PRINCIPAL FIELDS OF COOPERATION WITHIN COOMET

The principal fields of cooperation within COOMET include:

- realisation of the CIPM Arrangement on Mutual Recognition of National Measurement Standards and Calibration and Measurement Certificates Issued by National Metrology Institutes (CIPM MRA);
- establishment and maintenance of primary standards of units and scales of physical quantities;
- dissemination of units from primary standards to working measuring instruments;
- participation in the CIPM key comparisons of national measurement standards and carrying out of regional comparisons of measurement standards;
- development of new measurement methods and new types of high accuracy measuring instruments;
- solution of problems of general metrology, including problems of the theory of measurement and uncertainties, system of units, terminology;
- establishment of a system of gathering and dissemination of information on metrology and measurement techniques, information technology;
- definition, collection, evaluation and certification of reference data used in metrology;
- creation and use of reference materials of composition and properties of substances and materials;
- harmonisation of requirements for measuring instruments subject to metrological control, as well as methods for their testing taking into consideration international recommendations;
- preparation of conditions for mutual recognition of results of metrological control and metrological supervision;
- implementation of calibration and recognition of its results according to the rules and procedures set up by international organisations;
- creation and implementation of Quality Management Systems of National Metrology Institutes;
- training and raising proficiency level of experts;
- improvement of the activities of the Organisation and its structural bodies.

MEMORANDUM OF UNDERSTANDING

SECTION 5 – STRUCTURE OF COOMET AND WORKING PROCEDURES

1. The COOMET body initiating and supporting cooperation is the Committee. It consists of the Heads of National Metrology Institutions of the COOMET Member Countries or persons appointed by them, one representative from each institution. The Committee ensures that the activity of COOMET is pursued in accordance with its objectives and contributes to accomplishing its tasks.
2. The Committee elects the President from among its Members, for a period of three years, with the eligibility to be re-elected for one subsequent term of office.
3. Each Committee Member accompanied by experts may take part in its meetings. Only Committee Members may vote.
4. The Committee may invite observers from other international or regional organisations to take part in their meetings.
5. The Committee meets as often as required but at least once per year.
6. At the suggestion of the President, the Committee approves nominees for the positions of Vice-Presidents from among its Members. The President, Vice-Presidents and Head of the COOMET Secretariat form the President's Council, which develops the policy of cooperation within COOMET, interacts with international and regional metrology organisations, organises cooperation between the Committee meetings and prepares questions to be considered at these meetings.
7. A year before scheduled election of a new COOMET President the COOMET Committee nominates a candidate which after mutual approval becomes a Member of the President's Council having a status of President Elect. After the expiry of a three year period of presidency the COOMET President keeps the status of Former President for one more year. At the end of this year the President Elect becomes an active COOMET President.
8. The Committee decides on its own Rules of Procedure and on those of other COOMET bodies.
9. As a rule the COOMET Secretariat is provided by the National Metrology Institute of the COOMET President.
10. The Secretariat assists the President and the President's Council in the management of COOMET and ensures contacts between the Committee Members, as well as between the Committee, structural and working bodies of COOMET.
11. Following the decision of the COOMET Committee the following COOMET Structural Bodies are established for the purpose of initiating work in the major fields and directions of cooperation: Joint Committees (JC), Technical committees (TC), Councils, Forums, etc.
The scope of their objectives, tasks and working and collaboration procedures is specified in relevant Provisions approved by the COOMET Committee.
Each COOMET Structural Body is headed by a chairperson appointed by the COOMET Committee for a period of 4 years with the possibility to prolong this period.
12. Structural Bodies may establish:
 - Subcommittees (SCs) in order to address the permanent tasks of collaboration;
 - Working Groups (WGs) within relevant SCs/TCs in order to carry out routine work on COOMET projects.
13. Terms of reference, head and staff of a SC are defined by the corresponding Technical Committee and approved by the COOMET Committee for a period of 3 years with possible prolongation of this period.
14. Organizational and financial matters are managed by structural and working bodies individually taking into account the hierarchy of the COOMET bodies.
15. National Metrological Institutions that are Members of COOMET may invite other institutions in their countries to cooperation, at their own discretion, for working on a project.

MEMORANDUM OF UNDERSTANDING

SECTION 6 – LANGUAGES

1. The languages of the Committee meetings are English and/or Russian.
2. Documents of wide dissemination to be received and sent by the Secretariat must be edited both in English and Russian.
3. Final reports written after completion of projects may be in English, French, German or Russian. The authors of the report are given the choice of a language sufficiently understood by those to whom they wish to convey their information or considerations.
4. In other cases, any language the cooperating partners consider adequate for their communication may be used.

SECTION 7 – RIGHTS

In order to achieve the objectives of COOMET, each Member of the Organisation will have the following rights:

- to have access, upon agreement, to national standards of other Members of COOMET;
- to seek cooperation and assistance in solving metrological problems;
- to propose projects for joint work and participate in their implementation;
- to receive information on the results of activities of COOMET Bodies.

SECTION 8 – OBLIGATIONS

In order to achieve the objectives of COOMET, each Member of the Organisation will accept the following obligations:

- to provide the Committee, upon its request and within reasonable limits, with information on projects carried out and planned in accordance with the scope of the COOMET activities;
- to provide COOMET Members with assistance and services upon mutual agreement;
- to participate in joint COOMET projects depending on its financial and technical resources, as well as its interest and competence;
- to maintain the confidentiality of any information on the results of type tests, verifications and calibrations of measuring instruments submitted by cooperating partners;
- to take into consideration the COOMET recommendations in the activity of its National Metrology Institutions and to promote the implementation of the results of COOMET projects in its country.

MEMORANDUM OF UNDERSTANDING

SECTION 9 – COOPERATION WITH INTERNATIONAL AND REGIONAL ORGANISATIONS

1. COOMET will make best use of the results of work of international metrology organisations:
 - International Organisations within Metre Convention: General Conference on Weights and Measures (CGPM), International Committee for Weights and Measures (CIPM) and International Bureau of Weights and Measures (BIPM);
 - International Organisation of Legal Metrology (OIML), International Committee for Legal Metrology (CML) and International Bureau of Legal Metrology (BIML);
 - International Laboratory Accreditation Cooperation (ILAC);
 - International Accreditation Forum (IAF);
 - International Measurement Confederation (IMEKO), etc.,
 - as well as other organisations of interest to metrology such as ISO, IEC, CODATA, and will follow their recommendations in its activities.
2. COOMET intends to cooperate, as far as there is mutual interest, with regional metrology organisations:
 - European Association of National Metrology Institutes (EURAMET),
 - European Cooperation in Legal Metrology (WELMEC),
 - European Cooperation for Accreditation (EA),
 - Asia-Pacific Metrology Programme (APMP),

- Asia-Pacific Legal Metrology Forum (APLMF),
- Asia Pacific Laboratory Accreditation Cooperation (APLAC),
- Scientific & Technical Commission on Metrology (STCMetr) of Euro Asian Council for Standardization, Metrology and Certification (EASC),
- Intra-African Metrology System (AFRIMETS),
- Inter-American Metrology System (SIM), etc.

SECTION 10 – VALIDITY OF MEMORANDUM

1. This Memorandum will come into operation on the date of its signing by at least four Signatories and remain open for further participants.
2. This Memorandum may be amended at any time by written agreement between at least three quarters of the Signatories.
3. If a Member on behalf of which this Memorandum has been signed, for any reason whatever, intends to terminate its participation in COOMET, it will notify the President of the COOMET Committee of this intention not later than six months in advance.
4. This Memorandum is concluded for a term of five years. Unless within this five year period revision or termination is proposed to the COOMET Committee by at least one third of the Signatories this Memorandum of Understanding will remain in effect for another five year period.

MEMORANDUM OF UNDERSTANDING

SECTION 11 – LIMITATIONS

1. Decisions of COOMET have an exclusively recommendatory nature.
2. The Secretariat's activities are financed at the expenses of the Party presiding in the COOMET Committee. On a voluntary basis, other COOMET Members can render financial support to the Secretariat, the President's Council and other COOMET bodies for the implementation of specific tasks.
3. This Memorandum does not limit the rights and obligations of the COOMET Members arising from other bilateral or multilateral cooperation agreements.

Done in Warsaw on 12 June 1991

in English and Russian,

updated and amended at the 10th COOMET Committee Meeting

in Almaty, Kazakhstan, on 25–26 May, 2000;

at the 12th COOMET Committee Meeting

in Havana, Cuba, on 6–7 May, 2002;

at the 15th COOMET Committee Meeting

in Vilnius, Lithuania, on 8–9 September, 2005,

at the 16th COOMET Committee Meeting

in Braunschweig, Germany, on 4–5 September, 2006, and

at the 19th COOMET Committee Meeting

in Baku, Azerbaijan, on 20–21 May, 2009

at the 22th COOMET Committee Meeting

in Cholpon-Ata, Kyrgyzstan, on 18–19 April, 2012

RULES OF PROCEDURE

Rules of Procedure presented below were agreed at the first COOMET Committee Meeting held in Warsaw on 13–14 November, 1991 and updated and amended at the 10th COOMET Committee Meeting (25–26 May, 2000, Almaty, Kazakhstan), at the 12th COOMET Committee Meeting (6–7 May, 2002, Havana, Cuba), at the 15th COOMET Committee Meeting (8–9 September, 2005, Vilnius, Lithuania), at the 16th COOMET Committee Meeting (4–5 September, 2006, Braunschweig, Germany), at the 18th COOMET Committee Meeting (15–16 May, 2008, Kharkov, Ukraine), at the 19th COOMET Committee Meeting (20–21 May, 2009, Baku, Azerbaijan) and at the 20th COOMET Committee Meeting (21–22 April 2010, Astana, Kazakhstan).

They amend the description of the COOMET structure and activities which are part of the Memorandum of Understanding and were adopted in accordance with Article 8 Section 5 of the Memorandum and should promote the effective solution of cooperation problems in the shortest time possible according to established procedures using modern information technology and communication facilities.

MEMBERS OF COOMET AND MEMBERS OF COOMET COMMITTEE

- From each State only one National Metrology Institution on behalf of which the Memorandum of Understanding has been signed, may be a Member of COOMET.
- Each COOMET Member must inform the President about the name and address of its appointed Committee Member.
- The Committee shall elect its President by secret ballot, by a simple majority of votes.
- A COOMET Member not represented at two

consecutive Committee meetings without giving the reasons for its absence shall be considered as having terminated its participation in COOMET.

Decision on the termination of participation of a COOMET Member in COOMET is to be made by open voting based on a simple majority of votes at the next COOMET Committee meeting.

2. COOMET PROJECTS

2.1. GENERAL

For each collaborative project a COOMET Project Form must be completed and sent to the Secretariat, which will arrange for its distribution to all Committee Members and to the head of the relevant SC/TC. This will enable all COOMET Members to keep themselves informed of areas of possible cooperation providing them with an opportunity to join cooperation.

Three separate forms are available 1:

PROPOSED COOMET PROJECT FORM

AGREED COOMET PROJECT FORM

COOMET PROJECT PROGRESS/FINAL REPORT FORM

Proposals for COOMET collaboration projects may be presented at any time. The collection of Agreed COOMET Projects will represent the working programme of COOMET.

The Committee Members will monitor the COOMET projects to ensure they are in agreement with COOMET aims and tasks and are conducted in accordance with the adopted procedures. The COOMET cooperation can be extended to involve institutions from non-member countries in the projects provided the participants of the cooperation agree.

Notes for the completion of the Forms are given in **Annexes 1-3** on pages 132-137.

1. Notes for the completion of the Forms are given in **Annexes 1-3** on pages 132-137.

2.2. SUBJECT FIELDS

The project should belong to one of the following subject fields:

- Acoustics, ultrasound, vibration;
- Electricity and magnetism;
- Flow measurement;
- Ionising radiation and radioactivity;
- Length and angle;
- Mass and related quantities;
- Photometry and radiometry;
- Physical chemistry;
- Thermometry and thermal physics;
- Time and frequency;
- Reference materials;
- General questions concerning measurements (General metrology);
- Legal metrology;
- Quality management systems;
- Information and information technology
- Joint scientific research.

2.3. PROPOSED COOMET PROJECT

The Proposer of a project shall fill in the form (Annex 1, see page 132), and send it to the COOMET Secretariat through the COOMET Committee Member of his/her country. The COOMET Secretariat shall register the project and distribute the form to the head of the relevant SC/TC, as well as to all COOMET Committee Members who will inform the Proposer and the COOMET Secretariat of their interest within a period of three months. In case if COOMET Members show no interest in the fulfilment of the proposed project, it can remain in the list of proposed projects for up to one year.

2.4. AGREED COOMET PROJECT

Agreed COOMET Project Forms, Annex 2 (see page 134), is used when agreement has already been reached between a certain number of partners to undertake a specific collaborative project. It is only through the completion of this Form that COOMET Members will be advised of the agreement in question.

The Working Group set up for accomplishing the project shall be composed of the persons stated in the Form. The Coordinator of the Working Group

shall be responsible for keeping the relevant SC/TC informed of the progress of the project.

Once completed the Agreed COOMET Project Form should be sent by the Coordinator to the head of the relevant SC/TC and to the COOMET Secretariat for distribution among the Committee Members and also for inclusion of the project in the COOMET Working Programme and data base.

Should any modification, e.g. of the composition of the Working Group or the scope of the project, be decided later, a revised Agreed Project Form shall be circulated.

In case of realising projects concerning the carrying out of comparisons related with the implementation of the CIPM MRA, the information in Box 6 in the form of the Agreed Project shall contain the following data in addition: comparison type, supported CMC, piloting NMI of the comparison, registration in the KCDB (except for the pilot ones).

2.5. COOMET PROJECT PROGRESS/FINAL REPORT

This Form, Annex 3 (see page 136), is used by Coordinators for reporting the progress on Agreed COOMET Projects, once a year.

A Final Report must be prepared when a Project has been completed.

In this Report the results obtained should be presented and possible applications stated. It is desirable to indicate the advantages of undertaking the work collaboratively through COOMET. The Final Report is not deemed as a publication of the work.

Collaborators are encouraged to publish their work through usual channels, mentioning that it was undertaken within COOMET.

The Coordinator shall send the completed Final Report Form to the head of the relevant SC/TC and the COOMET Secretariat.

2.6. CANCELLATION OF COOMET PROJECTS

According to suggestions of the heads of SCs/TCs the COOMET Secretariat excludes the projects recognised as unpromising and obsolete from the Working Programme, however retaining the information about these projects.

RULES OF PROCEDURE

3. ANNUAL REPORTS ON THE ACTIVITIES OF COOMET BODIES

1. A Coordinator of the WG dealing with the agreed COOMET projects sends annually the intermediate progress report on the project to the head of the relevant SC/TC by 15 January. The head of the SC/TC can address the Coordinator of the WG with a request to submit information on the progress with the project in a month time before the meeting of the SC/TC.
2. The head of the SC/TC prepares Annual Progress Report of the SC/TC and forwards it to the Chairperson of the relevant COOMET Structural Body 31 January.
3. Based on the reports of the SCs/TCs the Chairpersons of the COOMET Structural Bodies prepare reports on the activities of their COOMET bodies and forward them annually by 15 February to the COOMET Secretariat and represent them at the COOMET Committee meeting.
4. Annual reports of the Chairpersons of the COOMET Structural Bodies established to fulfil specific tasks within COOMET, should have the following Sections,
 - general characteristic of the cooperation in the corresponding field including information on specific activities and projects being carried out and on the participants involved in cooperation;
 - results of the last meetings of the COOMET Structural Bodies and subordinated SCs/TCs;
 - review of the projects completed and information on the use of the results obtained;
 - problems of cooperation with international and regional organisations in the corresponding field of cooperation;
 - activities for the implementation of international agreements (e.g., the Arrangement on Mutual Recognition of National Measurement Standards and Calibration and Measurement Certificates Issued by National Metrology Institutes, etc.);
 - information on the prospective place and date for the following meetings of the COOMET Structural Bodies and subordinated SCs/TCs;
 - proposals for the resolutions of the COOMET Committee meeting.The total volume of the report should not exceed three to five pages.
5. The COOMET Secretariat prepares Annual Report on COOMET activities based on the reports submitted by

the Structural Bodies, and distributes it to the Committee Members annually by 15 March.

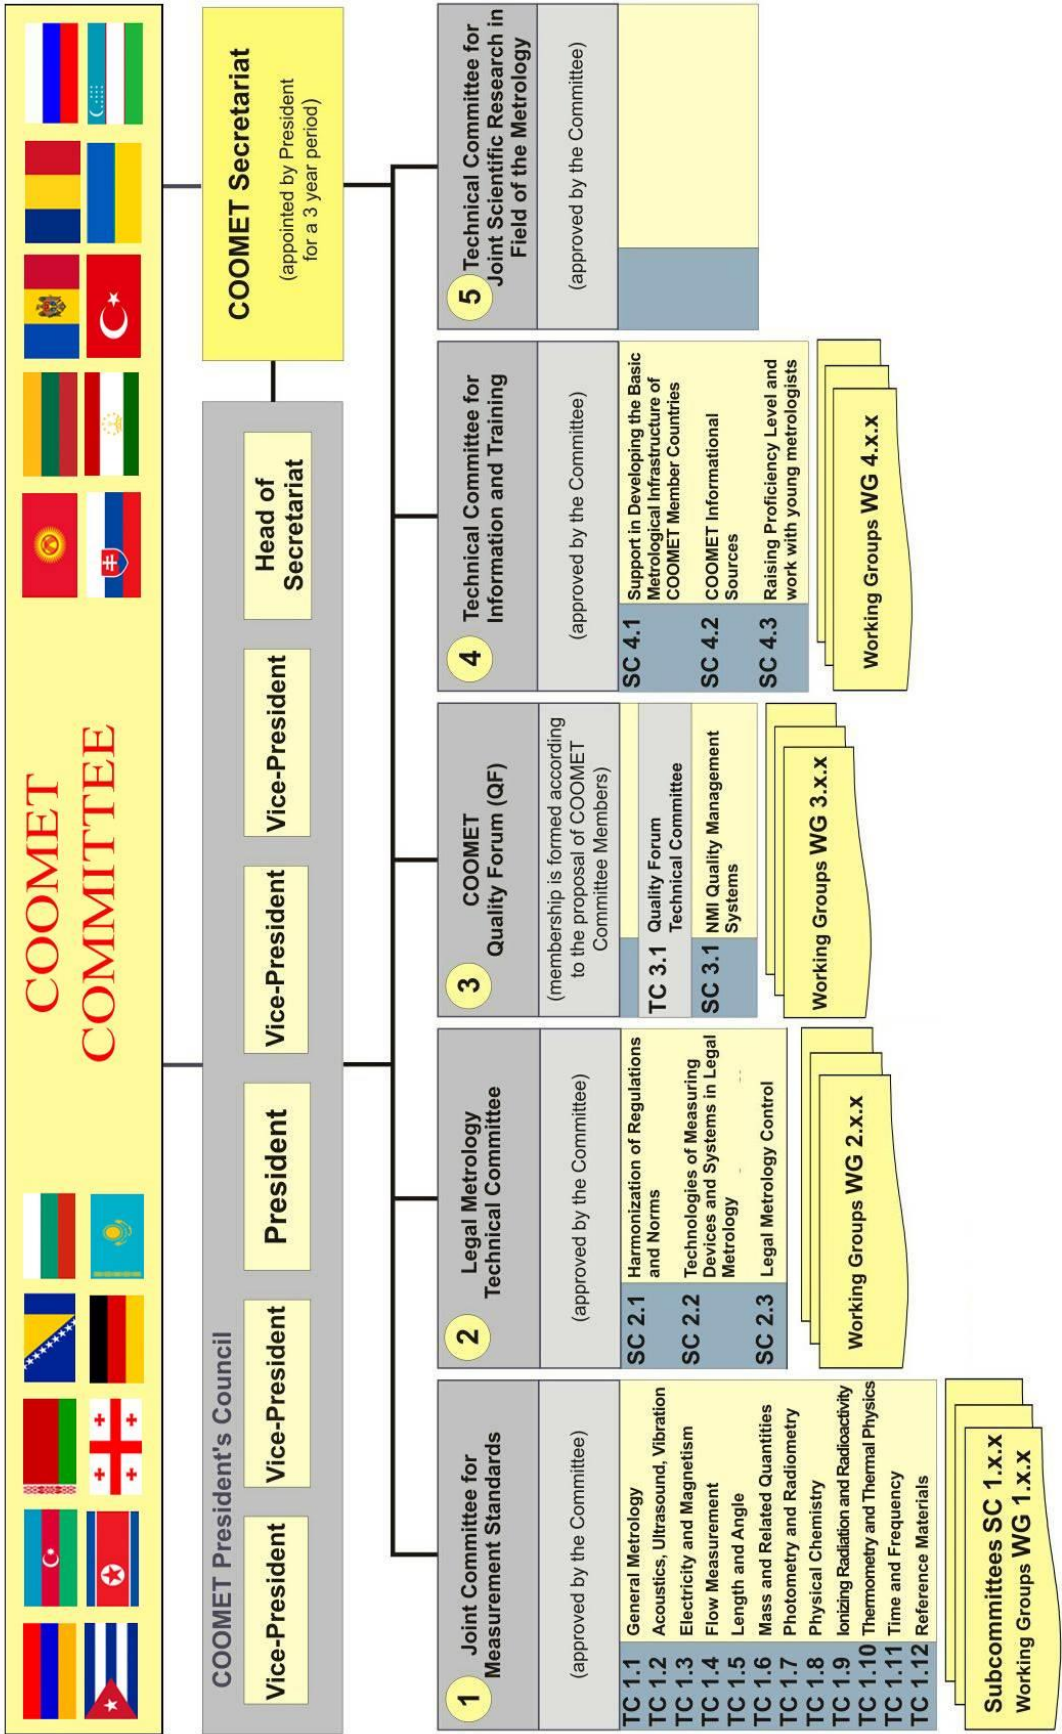

4. COMMITTEE MEETINGS / CONVOCAION AND PROCEDURE

- 4.1. The President will decide on the place and date of the meeting, taking into consideration the proposals formulated by the Committee Members during their last meeting.
- 4.2. The President shall notify about the meeting at least ten weeks in advance and also send the preliminary draft agenda with the request to inform the President about their amendments and more precise definitions within a three week period.
- 4.3. The draft agenda is distributed among the delegates at least four weeks in advance of the meeting.
- 4.4. The agenda shall be approved by the Committee at the beginning of the meeting.
- 4.5. A quorum will be constituted by more than half of the Committee Members.
- 4.6. The Committee will attempt to reach conclusions by consensus, whenever possible. If a compromise cannot be reached, the different points of view shall be recorded in the minutes.
- 4.7. A draft report of the Committee meeting shall be circulated by the Secretariat to all Committee Members within 3 months of the meeting. In order to speed up the realisation of the resolutions adopted at the Committee meeting, it is recommended to the COOMET Secretariat to prepare and distribute to the Committee Members the list of drafts of such resolutions at the end of the meeting. The approval of the minutes of the corresponding Committee meeting is performed through e-mail during 1 month after they were received from the COOMET Secretariat.
- 4.8. Between the meetings the Committee can discuss any questions by correspondence involving all Committee Members as well as solve problems of cooperation at the President's Council, the meetings of which are convened by the President as required, but not less than once a year between the COOMET Committee meetings.
- 4.9. Similar rules may be followed by all structural and working bodies of COOMET.

5. AMENDMENT OF RULES OF PROCEDURE

These Rules of Procedure can be amended only by the consent of at least half of the Committee Members.

COOMET PROJECTS (Notes for the completion of COOMET Project Forms)

PROPOSED COOMET PROJECT

Box 1 Reference No.

It will be given by the COOMET Secretariat.

Box 2 Subject Field

The subject field should be chosen from the list in item 2.2 of the Rules of Procedure.

Box 3 Field of cooperation

The field of cooperation should conform to one of the following

- comparisons;
- research;
- advice and training;
- traceability and calibration.

Box 4 Partners

Members of COOMET, who have already expressed their willingness to participate in the proposed cooperation, should be indicated by their initials. If specific institutions are involved, they should be indicated by full names together with the letters signifying their country (see ISO 3166-1981, code Alpha-2), e.g. BG, CS, DE, HU, PL, RO, SU, etc.

Box 5 Subject

The specific subject of the proposed cooperation should be defined in not more than 60 characters (including spaces).

Box 6 Description

Within the space provided a brief description of the proposed project should be given. Sufficient details should be provided for experts from other institutions so that they can assess their capabilities to join cooperation.

Box 7 Additional remarks

This box provides an opportunity for adding any additional remarks relevant to the proposed collaborative project, e.g. previous cooperation, advantages of implementation, etc.

Box 8 Proposer's name

The name, full postal address, fax numbers and e-mail of the person proposing the cooperation should be given.

Box 10 Date

The Form should be dated the day of signature.

Box 11 Proposed starting date

A proposed starting date should be given.

COOMET PROJECTS (Notes for the completion of COOMET Project Forms)

AGREED COOMET PROJECT

Guidance on completion of **boxes 1, 2, 3 and 5, 6, 7** of the Agreed COOMET Project Form is the same as that on completion of the corresponding Boxes in the Proposed COOMET Project Form.

Box 4 Working Group

Names of experts forming the Working Group and names (or initials) of their institutions, as well as letters signifying their countries should be given.

Box 8 Coordinator's name, address, etc.

The person nominated by the Working Group as its Coordinator should be indicated.

Box 9 Date project agreed Ref. No. of proposal

Date on which an agreement was reached and the Reference No. of the Proposed COOMET Project should be given.

Box 10 Starting date

The date it has been agreed to start the project.

Box 11 Expected completion date

An expected completion date must be given. For permanent agreement (e.g. time service) "ON-GOING" should be entered.

Box 13 Date

The Form should be dated the day of signature.

FOR PROJECTS RELATED WITH COMPARISONS

Box 6 Description

A short description of the comparison with compulsory indication of the type of comparison, calibration and measurement capabilities (CMC) supported by the comparisons, as well as the piloting NMI of the comparison and registration in the KCDB (except for the pilot ones) should be given in this box.

COOMET PROJECTS (Notes for the completion of COOMET Project Forms)

COOMET PROJECT PROGRESS/FINAL REPORT

Boxes 1-5

The content of the corresponding Boxes in the Agreed COOMET Project Form should be reproduced.

Box 6 Progress

A brief description of the progress up to date should be entered in the space provided.

Box 7 Coordinator's name, address, etc.

As in the Agreed COOMET Project Form.

Box 8 Completion date

If the progress of the project is being reported then an estimated completion date should be given.

If the project has now been completed then the actual date of completion should be given.

For permanent agreements "ON-GOING" should be entered.

Box 10 Date

The Form should be dated the day of signature.

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

ARMENIA

Area: 29.74 thousand km²

Population: 3.2 million

Capital: Yerevan

Time zone: UTC+4

National currency: dram

According to the Law on Ensuring the Uniformity of Measurements of the Republic of Armenia of 26 May, 2004, the National Institute of Metrology under authority of the Ministry of Economy of the Republic of Armenia was established on the basis of the Closed Joint-Stock Company "Metrologist".

At this time legal basis for fulfillment of Ensuring the Uniformity of Measurements is Law on "Ensuring the Uniformity of Measurements" of The Republic of Armenia N 22-N, 8 February, 2012 (amendments and corrigendum N 42-N from 30 April, 2013 and N 235-N from 17 December, 2014) which establishes legal, economic and organizational basis for ensuring the Uniformity of measurements. This Law is directed towards the protection of the rights and legitimate interests of the citizens and economy of the Republic of Armenia from the consequences of invalid measurement results.

On the Basis of RA Law on Ensuring the Uniformity of Measurements adopted in 2012, "National Institute of Metrology" CJSC is recognized as a National Body for Metrology by Government Decision N 882-N from 4 July, 2012.

Activity of metrology services, development of metrologic systems and state management is carried out by the Ministry of Economy of the Republic of Armenia.

State Metrology Service is headed by National Body for metrology - "National Institute of Metrology" CJSC.

Management: Mr. Yerem Chakhoyan

Address: 49/4 Komitas Ave., 0051 Yerevan, Republic of Armenia

Telephone: +374 10 23 26 00

Fax: +374 10 23 54 78

E-mail: info@metrology.am

Main activities of the National Institute of Metrology are as follows:

- carrying out of state policy in the field of uniformity of measurements;
- development of normative and methodical documents in metrology;
- development of legal and other acts regarding uniformity of measurements;
- type approval of measuring instruments imported into Armenia and domestically produced;
- maintenance of the register of approved measuring instruments and reference materials;
- provision of reproducibility of units of measurements and their dissemination to the working measuring instruments used by metrological services of organisations, as well as by testing and measuring laboratories accredited by it;
- carrying out of research with the purpose of ensuring the uniformity of measurements;
- performance of state tests, verification and metrological attestation of measuring instruments and testing equipment;
- provision of comparisons of national standards with intergovernmental and international standards;
- traceability to primary standards of national standards;
- carrying out metrological attestation of measurement techniques, metrological examination of normative documents in metrology;
- performance of other functions stipulated by the legislation and the Statute of the Institute.

56 units of reference measuring instruments represent the technical basis of the system for assuring uniformity of measurements of the Republic of Armenia.

Detailed information about the institute and its activities can be found at:

www.metrology.am

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

AZERBAIJAN

Area: 86 600 km²

Population: about 9.550 million for 16.03.2015

Capital: Baku

Time zone: UTC+4

National currency: manat

State Metrology Service under the State Committee for Standardization, Metrology and Patent of the Republic of Azerbaijan is the national metrology body in this country.

The State Committee for Standardization, Metrology and Patent of the Republic of Azerbaijan (Committee) established on the basis of the Decree of the President of the Republic of Azerbaijan No. 53 of 19 November, 2008, is the state body which carries out the state policy in the fields of standardization, metrology, certification, accreditation and protection of the industrial and intellectual proprietary rights.

Chairman: Mr. Hasanov Ramiz Ayvaz oghly
Address: 124 Mardanov gardashlary str., AZ 1147 Baku, Republic of Azerbaijan
Telephone: +99412 449 99 59
Fax: +99412 440 52 24
E-mail: azs@azstand.gov.az;
Website: www.azstand.gov.az

The legislative base for the functioning of the state body in the field metrology is the Law of the Republic of Azerbaijan "On Provision of the Unanimity of Measurements", Regulations and Orders of the Cabinet of Ministries of the Republic of Azerbaijan, Statute of the Committee and State Metrology Service.

The goals of the state body in the field metrology in Azerbaijan are as follows:

- protection of the rights and legitimate interests of the citizens, the established law, order and economy of the Republic of Azerbaijan from negative consequences of doubtful measurement results;
- assistance to scientific and technical and economic progress on the basis of application of the state standards of units and use of measurement results of high and guaranteed accuracy expressed in the units admitted for application in the country;
- creation of favourable conditions for international and inter-regional relations;
- regulation of relations of the state bodies of the Republic of Azerbaijan with legal and physical persons in the field of development, manufacture, checking, test, operation, repair, sale, import and export of measuring instruments;
- creation of conditions for mutual recognition of results of tests, verifications and calibrations with a view of elimination of technical barriers in bilateral and multilateral external economic relations.

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

In the field of metrology, according to the legislation, the State Committee for Standardization, Metrology and Patents of the Republic of Azerbaijan is **assigned the following functions**:

- definition of the general metrological requirements to measuring instruments, measurement methods and results;
- development and carrying out of the state policy in the field of maintaining the uniformity of measurements;
- state metrological control and supervision;
- establishment of the rules of creation, approval, storage and application of measurement standards;
- approval of the state standards; carrying out of intergovernmental comparison of state measurement standards;
- establishment of the rules of certifications of measurement procedures;
- organisation of the elaboration and approval of national standards in the field of metrology;
- accreditation of testing centres;
- approval the list of measuring instruments subject to calibration and checking;
- organisation and coordination of activities of the state inspectors on maintenance of the uniformity of measurements;
- approval of the type of measuring instruments;
- maintenance of the state register of measuring instruments;
- organisation of the activity and accreditation of metrological services of legal and physical entities for the right of carrying out calibration work;
- approval of normative documents on measurement assurance;
- realisation of other functions stipulated by the legislation of the country and the Statute about the Committee.

In the field of metrology the Committee implements its authorities through Metrology department of Central Administration, State Metrology Service under the Committee, Metrology Control

Department of the State Control Service for Technical Regulation and Standardization under the Committee, Experimental-Testing Center (AzTEST) and relevant divisions in the regional of the country.

State Metrology Service under the Committee represents Azerbaijan as a member of COOMET.

Chief: Mr. Oktay Abbasov Abbas oghly
Address: 124 Mardanov gardashlary str., AZ 1147 Baku, Republic of Azerbaijan
Telephone: +99412 440 63 16
+99412 449 99 59
Fax: +99412 440 63 16
E-mail: metrology@azstand.gov.az
Website: www.metrology.gov.az

The following structural divisions are included in the structure of the State Metrology Service:

- division of the design and development of standards;
- division of legal metrology;
- division of the national standards of force and pressure;
- division of the national standards of density and viscosity;
- division of the national standards of temperature;
- division of the national standards of mass;
- division of the national standards of electric quantities;
- division of the national standards of frequency and time;
- division of the national dosimeter standards
- division of the standard samples of gaseous mixtures;
- financial-administrative division.

During 2014, about 539 240 measuring instruments have been verified by the employees of the State Metrological Service under the State Committee for Standardization, Metrology and Patent of the Republic of Azerbaijan.

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

BELARUS

Area: 207.6 thousand km²

Population: 9,483 million

Capital: Minsk

Time zone: UTC+3

National currency: Belarusian ruble

The legal basis of the system for assuring the uniformity of measurements of the Republic of Belarus (SAUM) is the Law on Assuring the Uniformity of Measurements and the Directives of the Government of the Republic of Belarus and the State Committee for Standardization of the Republic of Belarus.

The state metrology service is headed by a national metrology body – **State Committee for Standardization of the Republic of Belarus (Gosstandart of Belarus)**.

Chairperson: Mr. Viktor Nazarenko
Address: 93 Starovilensky Trakt, 220053
Minsk, Republic of Belarus
Telephone: +375 17 233 52 13
Fax: +375 17 233 25 88
E-mail: belst@gosstandart.gov.by

The major activities are as follows:

- maintenance of the common policy on the matters regarding measurement assurance, as well as coordination of the implementation and development of the SAUM of the Republic of Belarus;
- establishment and maintenance of the state metrological service;
- submitting of proposals for application of units of measurement in the Republic of Belarus to the Council of Ministers of the Republic of Belarus;
- development of legal and other directives aiming at assuring the uniformity of measurements; determination of priorities in metrology development;
- organisation of the development and approval of national standards and other normative documents regulating the implementation of the SAUM;
- organisation of the publication and dissemination of technical standards and scientific-technical information in the field of metrology including reference data;

- setting requirements for national measurement standards and measurement standard, as well as rules of their development, approval, maintenance and use;
- type approval of imported and domestically produced measuring instruments;
- organisation and performance of metrological surveillance;
- coordination of the cooperation in the field of metrology at the international level; representation of the Republic of Belarus in the international metrology organisations and collaboration with national metrology of other countries.

Gosstandart coordinates the activity of the following:

- Interindustry Commission of time and frequency and determination of the Earth rotation parameters,
- Interindustry Commission of reference substances and materials of composition and properties;
- Interindustry Commission of reference data of physical constants and properties of substances and materials.

Technical basis of the SAUM is represented by 53 national and primary measurement standards of the Republic of Belarus and about 3 500 reference measuring instruments.

The leading organisation in the field of developing and maintaining measurement standards is the National Metrology Institute – **Belarussian State Institute of Metrology (BelGIM)**.

Director: Dr. Valery Hurevich
Address: 93 Starovilensky Trakt, 220053
Minsk, Republic of Belarus
Telephone: +375 17 233 55 01
Fax: +375 17 288 09 38
E-mail: info@belgim.by
coomet@belgim.by

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

The major activities of BelGIM are as follows:

- development of scientific-methodological and procedural basis of the system for assuring the uniformity of measurements of the Republic of Belarus (SAUM);
- coordination and performance of fundamental and practical research;
- development, maintenance and comparison of national measurement standards with the international measurement standards or national measurement standards of other countries;
- recognition of national measurement standards by other countries;
- reproduction of measurement units and their dissemination to the measurement standards at the level of metrology services of enterprises and accredited laboratories;
- development of a uniform scientific-technical policy in the field of metrology and assurance of the uniformity of measurements;
- development of technical directives, national and interstate written standards, measurement procedures and methodological documents in the field of metrology;
- development of the criteria for classification of devices as measuring instruments;
- carrying out of state type approval tests, verification, calibration and metrological evaluation of measuring instruments and other metrology related work;

- maintenance of the state register of national measurement standards of the Republic of Belarus and the state register of approved measuring instruments;
- carrying out of metrological evaluation of measurement procedures and calibration of test equipment;
- participation in the cooperation projects in the field of metrology at regional and international levels as a National Metrology Institute (NMI);
- participation in training and improving the professional skills of personnel engaged in metrology.

The State Metrology Service includes **15 regional metrology bodies of Gosstandart**.

Besides collaboration within COOMET there are good relations in the field of metrology with the following organisations:

- International Organisation of Legal Metrology (OIML);
- International Bureau of Weights and Measures (BIPM);
- Interstate Council on Standardisation, Metrology and Certification (EASC);
- International Organisation of Standardization (ISO).

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

Institute of Metrology of Bosnia and Herzegovina (IMBIH) – representing National Metrology Institute in Bosnia and Herzegovina, directly responsible to the Council of Ministers of Bosnia and Herzegovina.

IMBIH is responsible for the establishment of a comprehensive measuring system in Bosnia and Herzegovina with traceability to the International System of Units, SI.

Areas of IMBIH's work are:

- Scientific Metrology
- Legal Metrology
- Industrial Metrology

1) Institute of Metrology of Bosnia and Herzegovina (IMBIH)

General Director: Mr. Zijad Dzemic

Address: Augusta Brauna 2, 71000 Sarajevo

Telephone: +387 (0) 33 568 902

Fax: +387 (0) 33 568 909

E-mail: zijad.dzemic@met.gov.ba

METROLOGY INFRASTRUCTURE IN BOSNIA AND HERZEGOVINA

- The Institute of Metrology of Bosnia and Herzegovina (IMBIH);
- Nominated Metrological Laboratories and Bodies (verification laboratories; control of prepacked products);
- The Entity Bureaus of Metrology: Bureau of Metrology of Federation of B&H and Republic Bureau of Standardization and Metrology of Republic of Srpska;
- Conformity Assessment Bodies for Measuring Instruments;
- Accredited Calibration laboratories.

IMBIH's responsibilities regarding Scientific Metrology

- Realization and maintenance of national

measurement standards ensuring their traceability to the internationally recognized measurement standards – realization of SI base and derived units

- Establishment of distributed measurement system by appointing other legal entity for performing responsibilities of national measurement standard holder
- Membership in RMOs and active participation in their activities
- Promotion of metrology
- To support research and development in all areas of metrology

IMBIH's responsibilities regarding Legal Metrology

- Issuance of bylaws in accordance with Law on Metrology
- Supervision of the implementation of Law on Metrology
- Nomination of laboratories dealing with verification
- Nomination of bodies for conformity assessment (MID and NAWI)
- Nomination of bodies for control of prepacked products
- Issuance and acceptance of Type approval

IMBIH's Membership in International Organizations

BIPM / CGPM (*International Bureau of Weights and Measures / General Conference for Measures and Weights*) - Associate Member since 2011

EMRP (*European Metrology Research Programme*) - Member since 2013

EURAMET (*European Association of National Metrology Institutes*) - Member since 2009

IAAO (*International Association of Official Metrology Offices*) - Observer since 2010

OIML (*International Organization of Legal Metrology*) - Corresponding Member since March 1997

WELMEC (*European cooperation in legal metrology*) - Associate member since 2009

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

BULGARIA

Area: 111 thousand km²

Population: 7.365 million

Capital: Sofia

Time zone: UTC+2

National currency: lev

The first Law on Measures and Weights was adopted by the Bulgarian Parliament in 1888 and thus the Bulgarian metrological service was established.

At present **the Bulgarian Institute of Metrology (BIM)** is the institution responsible for the implementation of the governmental policy in the field of metrology. This institution carries out activities in the field of metrology for providing traceability, accuracy and reliability of measurements in Bulgaria. Its responsibilities are laid down in the new Law on Measurements in 2002 and its amendments of 2005, 2008, 2009 and 2011.

Bulgarian Institute of Metrology (BIM)

President: Mr. Paun Ilchev
Address: 52-B, Blvd G.M.Dimitrov 1040
Sofia, Bulgaria
Telephone: +359 2 873 52 77
Fax: +359 2 873 52 72
E-mail: bim@bim.government.bg
p.ilchev@bim.government.bg

The major objectives of BIM are focused on promoting the government policy in the field of metrology and on providing traceability, accuracy and reliability of the measurements in Bulgaria. The main BIM activities are performed by the Directorate General “National Centre of Metrology”, Directorate General “Measures and Measuring Instruments” and Directorate “Testing of Measuring Instruments, Devices and Equipment”.

The Directorate General “National Centre of Metrology” (DG NCM) realises the BIM policy in the field of fundamental metrology

General Director: Mr. Sasho Nedialkov
Address: 52-b G.M. Dimitrov Blvd., 1040
Sofia, Bulgaria
Telephone: +359 2 873 52 88
Fax: +359 2 970 27 35
E-mail: s.nedialkov@bim.government.bg

The major activities of DG NCM include:

- developing long-term program on elaboration and improvement of the national measurement standards;
- development, maintenance and improvement of national measurement standards;
- providing traceability of national measurement standards to international standards or to the standards of the Signatories of the Metre Convention;
- taking measures on assuring traceability of measurements in case if there is no approved national measurement standards or this standard is out of service;
- organisation and participation in international comparisons in order to determine the level of equivalence of national standards;
- dissemination of units from the national measurement standards to the standards of lower level through calibration;
- coordinating the activities of measurement standards 'keepers;
- keeping the register of approved national measurement standards;
- carrying out approval of software for processing measurement data;
- certification of reference materials and coordination of implementation of the long-term policy on developing and maintaining certified reference materials;
- keeping the register of certified reference materials and publishing this register in a special edition;
- carrying out the activities on creating the conditions for mutual recognition of measurement standards in the framework of the Agreement (MRA) initiated by CIPM;
- participation in the work of CIPM, EURAMET and COOMET technical committees.

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

The Directorate General “Measures and Measuring Instruments” (DG MMI) realises the BIM policy in the field of legal metrology

General Director: Mr. Valentin Starev

Address: 52-b G.M. Dimitrov Blvd., 1040
Sofia, Bulgaria

Telephone: +359 2 873 52 98

Fax: +359 2 873 52 98

E-mail: v.starev@bim.government.bg

The major activities of DG MMI include:

- carrying out initial and subsequent verification of measuring instruments;
- carrying out metrological expertise of measuring instruments;
- carrying out conformity assessment of measuring instruments and non-automatic weighing instruments;
- participation in the work of OIML, WELMEC and COOMET technical committees;
- carrying out calibration of measuring instruments;
- carrying out initial and subsequent verifications of Stage II vapour recovery systems;
- authorisation of bodies for carrying out initial and subsequent verifications of Stage II vapour recovery systems.

The Directorate General “Measures and Measuring Instruments” includes **8 regional departments**.

The Directorate “Testing of Measuring Instruments, Devices and Equipment” (D TMIDE) realises the BIM policy in the field of legal metrology

Acting Director: Mrs. Hristina Sokolova

Address: 52B “G.M.Dimitrov” Blvd., 1040
Sofia, Bulgaria

Telephone: +359 2 970 27 99

Fax: +359 2 873 52 72

E-mail: ddisius@bim.government.bg

The major activities of D TMIDE include:

- carrying out type approval of legally controlled measuring instruments;
- keeping the register of approved types of measuring instruments;
- carrying out conformity assessment of measuring instruments and non-automatic weighing instruments;
- participation in the work of OIML, WELMEC and COOMET technical committees;
- carrying out calibration of measuring instruments;
- carrying out testing of types, versions and modifications of gambling equipment and gambling software of communication equipment;
- carrying out testing and preparing proposals for type approval of fiscal devices, including electronic cash devices with fiscal memory, fiscal printers, fiscal devices built in vending machines, electronic systems with fiscal memory for liquid fuels sales, local networks of fiscal devices, integrated automated business systems and fiscal devices built-in automats for currency exchange;
- keeping the public register of the approved types of fiscal devices, electronic systems with fiscal memory, local networks of fiscal devices and integrated automated business systems;
- carrying out testing of products for electromagnetic compatibility and environmental impact.

The Directorate “Testing of Measuring Instruments, Devices and Equipment” includes **Conformity Assessment of Measuring Instruments Department, Testing of Measuring Instruments Department, Electromagnetic Compatibility and Environmental Impact Department, Gambling Machines and Fiscal Devices Department**.

The National Research Institute on Metrology (INIMET) of Cuban National Bureau of Standards as NMI, is the institution responsible for measurement standards and scientific metrology. It is in charge of the following main activities:

- to implement, improve, maintain and compare, at the international level, the Cuban national measurement standards and transfer their values to secondary standards;
- to carry out research and scientific-technical development in the field of metrology;
- to calibrate working standards and instruments of secondary laboratories;
- to carry out pattern evaluation of measurement instruments;
- to participate in the elaboration of standards and technical regulations for verification and calibration of measuring instruments;
- to educate and train specialists for legal metrology and industrial calibration laboratories.

See note 1 for quality system.

The **Centro de Isótopos** (CENTIS) is the designated laboratory in the field of Radioactivity. CENTIS belongs to the Agency of Nuclear Energy and Advanced Technologies of the Ministry for Science, Technology and Environment (CITMA). The main objective of this center is the production and R&D of radiopharmaceuticals, RIA kits and radioactive labelled compounds for the Cuban Health System as well as to perform specialized technical services and application of Nuclear Techniques to solve economical national problems, including those related to metrology of ionizing radiation. The Department of Radionuclides Metrology of the Centro de Isótopos, the CENTIS-DMR, is responsible for the establishment, developing, conservation, custody and diffusion of National Standards of Radionuclide Activity units (Becquerel). CENTIS-DMR is the scientific and methodological warrantor for achieving the traceability to these standards of the radioactivity measurements performed at national level.

The Centro de Protección e Higiene de las Radiaciones (CPHR) is a designated laboratory mainly responsible for the dosimetry standards in the field of ionizing radiation. The Dosimetry Laboratory of the CPHR performs the following obligations:

- to maintain traceability in Cuba to the international measurement system through implementing and improving national standards and calibrating measuring instruments;
- to participate in comparison exercises of the standards at international level;
- to carry out research and scientific-technical development in the field of ionizing radiation metrology;
- to provide education to specialists and users in the field of radiation measurements.

See note 1 for quality system.

Note 1:

INIMET, CENTIS and CPHR have established a quality system in correspondence with the ISO/IEC 17025 and the Mutual Recognition Arrangement for national measurement standards and for calibration and measurement certificates issued by National Metrology Institutes. In 2008, this system was accredited by the National Accreditation Body (ONARC) of the Republic of Cuba and recognized by the Regional Metrology Organization COOMET, in accordance with the above-mentioned international standard.

The institutions responsible for Legal Metrology are:

a) Cuban National Bureau of Standards (NC)

that is responsible for the development of metrology and legal metrology and performs the functions of the central steering body of state administration in the field of metrology.

The main tasks and activities of the NC in the field

of metrology are:

- elaboration and realisation of state policy in metrology;
- preparation of laws and decrees referring to metrology;
- steering of metrology in the state in the scope given by the Law on Metrology, including subordinate metrological institutions and Legal Metrology Service;
- methodical activity and supervision of activities in metrology;
- representation of the Republic of Cuba in the international metrological associations.

General Director: Dr. Nancy Fernández Rodríguez

Director of Metrology: Mr. Fernando Arruza Rodríguez

Address: Calle E No 261 entre 11 y 13- Vedado
 La Habana 10400, Republic of Cuba

Telephone: +537 682 95 24

Fax: +537 682 78 50

E-mail: nc@ncnorma.cu,
arruza@ncnorma.cu

b) Territorial Centres of Metrology (TCM) which are subordinate institutions of NC. These institutions are charged with the following main activities:

- to verify the legal measurement instruments;
- to calibrate the working standards of measurement units (for industry);
- to calibrate the ordinary measuring instruments for customers;
- to carry out the pattern evaluation of measuring instruments.

TCM laboratories were accredited by ONARC according to ISO IEC 17025 standard.

c) The other institutions in the field of legal metrology are Metrological Laboratories (Industry). These institutions (established in factories or other organisation) are calibration laboratories. NC authorises some of them for verification of the specified kinds of legal measuring instruments, if necessary.

The calibration of ordinary measuring instruments is performed by more than 170 calibration laboratories, established in the framework of industry or other organisations.

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

DPR OF KOREA

Area: 109.89 thousand km²

Population: 22.6 million

Capital: Pyongyang

Time zone: UTC+9

National currency: won

The legal foundation of metrology in DPR Korea is the Law of DPR Korea on Metrology adopted in 1993.

The institution responsible for standards, scientific metrology and calibration service is **Central Institute of Metrology (CIM)**.

Its main tasks are:

- maintenance and management of national standards for the measurement units of physical quantities;
- fundamental research in the field of metrology;
- development of national standards and reference measuring instruments;
- calibration and international comparison of various kinds of reference measuring instruments;
- pattern approval of measuring instruments;
- research for the establishment of law and regulations on metrology;
- train of the experts and dissemination of scientific and technical knowledge on metrology;
- international exchange in the field of metrology.

Director: Mr. Jang Myong Il

Address: Sonsin-Dong No.1, Sadong District, Pyongyang, DPR of Korea

E-mail: pdk0301@163.com

Institution responsible for legal metrology is **State Administration for Quality Management (SAQM)** responsible for the metrological works in the country.

It is charged with the following main activities:

- to elaborate and realize the state policy in metrology;

- to define and register the measurement standards for the unification of measurement units and maintenance of their accuracy;
- to approve the measuring means;
- to accredit the self-calibration institution;
- to organize and carry out the inspection and supervision in the field of metrology;
- to elaborate the law, regulations and rules on metrology;
- to approve the guidelines to the calibration and pattern evaluation.

Management: Mr. Pak Song Guk,
Acting President
Dr. Jo Hui Kon, Director,
Department of Metrology

Address: Inhung-Dong No.1, Moranbong District, Pyongyang, DPR Korea

Territorial Institutions of Calibration are the subordinate of SAQM. These institutions are charged with the following main activities:

- to maintain the working standards and reference instruments;
- to calibrate the ordinary measuring instruments belonging to the category of state calibration within the territory;
- to carry out the supervision and control on metrology;
- to give technical and administrative guidance to the self-calibration institutions within the territory.

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

GEORGIA

Area: 69,7 thousand km²

Population: 4.6 million

Capital: Tbilisi

Time zone: UTC+4

National currency: lari (GEL)

Georgian Metrology Institute is a structural unit of Legal Entity of Public Law – **Georgian National Agency for Standards and Metrology (GEOSTM)**, which is in the system of the Georgian Ministry of Economy and Sustainable Development. Legal basis for providing uniformity of measurement in the country is Product Safety and Free Movement Code, which includes laws “About Provision Uniformity of Measurements”, and also other laws related to Quality Infrastructure.

Objectives, functions, rights and obligations of the agency are represented by:

- Participation in creation and development of measurement standards base for verification, calibration, examination and type approval works of measuring equipment (including imported ones) in accordance with the legislation in force;
- Participation in forming and conducting state policy in the field of standardization and metrology and coordination of activities in these fields;
- Participation in forming of metrological system in accordance with the legislation in force;
- Participation in developing normative base for improving fields of uniformity of measurement;
- Organization and conduction of works on reproducing measurement units by means of measurement standards for providing uniformity of

measurements on the whole territory of the country;

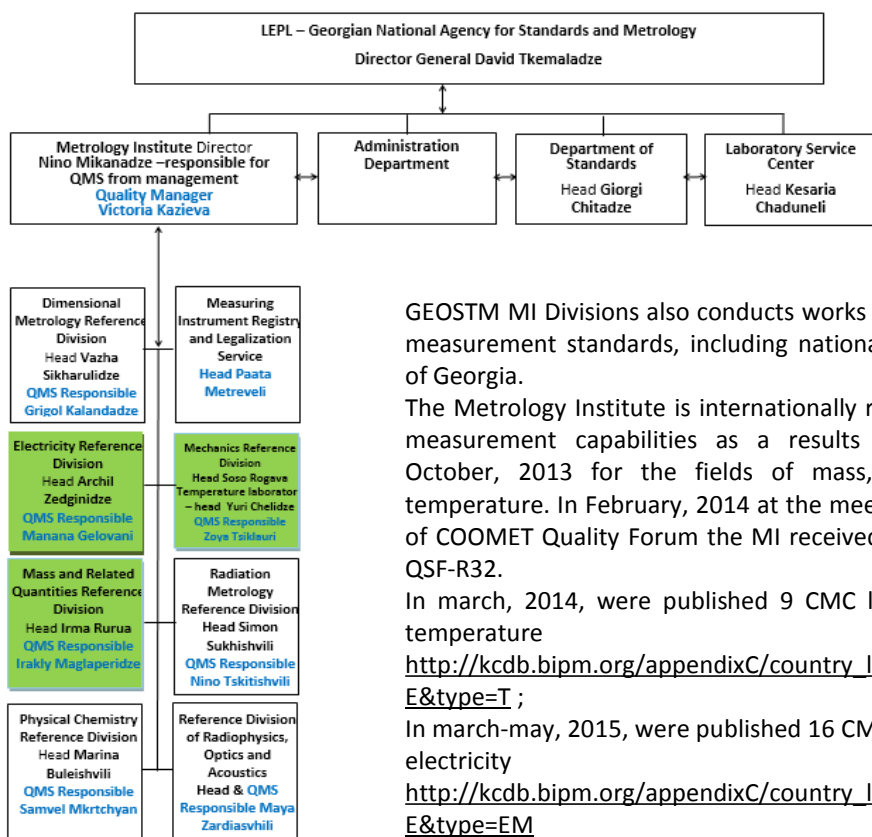

- Participation in works of developing scientific-methodic basis for developing system of uniformity of measurements;
- Organization of works related to standards registry, its management and provision of publication of standards list (registry);
- and other kinds of activities.

MI activities covers works on:

- development and improvement of measurement standards base
- calibrations and measurements
- verification
- expert measurements
- type approval
- recognition of initial verification, etc.

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

GEOSTM Organizational Structure

GEOSTM MI Divisions also conducts works on maintenance and support for measurement standards, including national state measurement standards of Georgia.

The Metrology Institute is internationally recognized for its calibration and measurement capabilities as a results of peer-review, conducted in October, 2013 for the fields of mass, electrical measurements and temperature. In February, 2014 at the meeting of the Technical Committee of COOMET Quality Forum the MI received relevant recognition certificate QSF-R32.

In march, 2014, were published 9 CMC lines of GEOSTM in the field of temperature

http://kcdb.bipm.org/appendixC/country_list_search.asp?CountSelected=G&type=T ;

In march-may, 2015, were published 16 CMC lines of GEOSTM in the field of electricity

http://kcdb.bipm.org/appendixC/country_list_search.asp?CountSelected=G&type=EM

And 5 CMC lines in the field of mass

http://kcdb.bipm.org/appendixC/country_list_search.asp?CountSelected=GE&type=M.

For 100% factor of availability of public information for the year 2014 (similarly like in 2012-2013) GEOSTM was awarded a certificate by the Institute for Development of Freedom of Information (IDFI).

1. The institution responsible for measurement standards and scientific metrology in Germany is Physikalisch-Technische Bundesanstalt (PTB).

It is the National Metrology Institute providing scientific and technical services.

PTB's responsibilities are to achieve progress and ensure reliability in the field of metrology for the benefit of society, economy and science with research, measurement and consulting being its main activities.

Areas of PTB's work are:

- realisation, reproduction and dissemination of the SI units;
- development of national measurement standards;
- determination of fundamental constants and exploitation of quantum effects for realising the units;
- provision of traceable reference materials and determination of material properties;
- development of accurate and reliable measurement procedures;
- contribution to standardization and technology transfer by consulting and seminars;
- pattern evaluations, approval and consulting;
- metrology in commercial transactions, environmental, labour and radiation protection, medicine and safety engineering;
- cooperation in European and international metrology organisations as well as with other metrology institutes;
- technical cooperation with developing and newly industrialised countries.

President of the PTB: Prof. Dr. Joachim Ullrich

Vice-President: Dr. Roman Schwartz

Member of Presidential Board: Dr. Jörn Stenger

Address: Bundesallee 100, 38116
Braunschweig, Germany

Telephone: +49 531 592 0

Fax: +49 531 592 9292

E-mail: Joachim.Ullrich@ptb.de

2. Institutions responsible for legal metrology

The basic principles of legal metrology are stipulated by the Units Act and the Verification Act, including the relevant implementing ordinances and additional regulations.

The physical and technical basis of the units to be applied in official and commercial transactions is today's International System of Units (SI).

The tasks of legal metrology are distributed between the federal and the state authorities.

PTB is responsible for type examination and type approval of measuring instruments and traceability to national standards used by the verification authorities.

The verification authorities of the sixteen states and the officially approved test centres for measuring instruments in the field of electricity, gas, water and heat are responsible for the individual testing of measuring instruments subject to mandatory verification.

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

3. Institutions responsible for calibration service

Calibrations are performed by the calibration laboratories accredited by the “**Deutsche Akkreditierungsstelle GmbH (DAkks)**” founded by the German Government in Cooperation with the German Federation of Industry (BDI) The basis of the DAkks (former DKD) accredited calibration laboratories is the traceability of their reference standards to the national standards provided by the National Metrology Institute, the PTB or other National Metrology Institutes. Industrial laboratories and other institutes which, due to their trained personnel and equipment, are able to perform measurements with the required uncertainty and whose standards are traceable to the national standards of the PTB, are accredited as calibration laboratories.

Accreditation is granted by DAkks after assessment of the laboratories in accordance with the standard DIN EN ISO/IEC 17025. Membership of DAkks in the

European Cooperation for Accreditation (EA) and the International Laboratory Accreditation Cooperation (ILAC) ensures the recognition of the calibration certificates in all member countries worldwide. At present there are about 440 accredited calibration laboratories for electrical, magnetic, dimensional, mechanical, acoustical, fluid and optical quantities, as well as for chemical analysis, reference materials, time and frequency, ionising radiation and radioactivity, temperature and humidity.

Head of the department Metrology of DAkks:

Dr. Michael Wolf

The activity in the field of metrology in the Republic of Kazakhstan is regulated by the Law on Assuring the Uniformity of Measurements establishing legal, economic and organizational bases of the uniformity of measurements. This Law is directed towards the protection of the rights and legitimate interests of the citizens and economy of the Republic of Kazakhstan from the consequences of invalid measurement results.

The Committee of Technical Regulation and Metrology of the Ministry of Investments and Development of the Republic of Kazakhstan (MEMST) is a national body state administration in charge of activities aimed at ensuring the uniformity of measurements.

Chairperson: Mr. Birzhan Kaneshev

Address: Center of Measurement Standards, Left bank of the river Ishim, Orynbor Str., 11, 010000, Astana, Republic of Kazakhstan

Telephone: +7(7172) 27 07 01

E-mail: sdandart@memst.kz

Website: www.memst.kz

In accordance with the Law of the Republic of Kazakhstan on Assuring the Uniformity of Measurements the main objectives of MEMST are:

- formation and realization of the state policy on assuring the measurement uniformity;
- coordination of activity of the metrology services of the Republic of Kazakhstan;
- establishment of measurement units admitted for application;
- organization of the conducting of research activities in the field of metrology;
- establishment of the rules of creation, approval, storage, use and comparisons of state measurement standards, improvement of measurement standard base of measurement units of the Republic of Kazakhstan;

- organization of comparisons of the results of verifying and calibrating measuring instruments;
- establishment of a classification of national standards of units used on the territory of the Republic of Kazakhstan;
- determination of the order of developing and approving normative documents on the assurance of measurement uniformity;
- determination of the common metrological requirements to instruments, measurement methods and results, procedures for verifying measuring instruments;
- determination of the order of using, producing and repairing measuring instruments;
- organization of the maintenance of the register of the state system of assuring measurement uniformity;
- organization and carrying out of the state metrological control;
- representation of the Republic of Kazakhstan in international and regional metrological organizations;
- organization of the proficiency development of specialists in the field of metrology.

Republic State Enterprise “Kazakhstan Institute of Metrology” (RSE “KazInMetr”) is a state scientific metrological centre.

General Director: Mr. Vassiliy Mikhilchenko

Address: Center of Measurement Standards, Left bank of the river Ishim, Orynbor Str.11, 010000, Astana, Republic of Kazakhstan

E-mail: 87020000667@mail.ru

Website: www.kazinmetr.kz

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

RSE “KazInMetr” carries out:

- activity directed towards the development of metrology in the republic;
- scientific-technical, practical, organizational-methodical activities with the purpose of improving the bases of the state system of assuring measurement uniformity of the Republic of Kazakhstan;
- creation and improvement of the measurement standards base of measurement units of the Republic of Kazakhstan, measurement standards comparisons;
- participation in improving the legal and normative bases of the state system of assuring measurement uniformity;
- harmonization of normative documents on metrology with international requirements;
- pattern approval of measuring instruments produced in the Republic of Kazakhstan and imported measuring instruments on type approval;
- information and normative support of organisations in the field of metrology;
- raising of the level of skills and further training of specialists in the field of metrology.

The international cooperation of MEMST in the field of metrology is realized within:

- International Organization of Legal Metrology (OIML);
- General Conference on Weights and Measures (CGPM);

- Euro-Asian Cooperation of National Metrological Institutions (COOMET);
- Euro-Asian Council for Standardization, Metrology and Certification (EASC);
- Interregional Standardization Association (IRSA);
- International Measurement Confederation (IMEKO);
- Asian-Pacific Metrology Programme (APMP).

In 2006 RSE “KazInMetr” signed The Mutual Recognition Arrangement (MRA) for national measurement standards and for calibration and measurement certificates issued by national metrology institutes. In 2008 Republic of Kazakhstan became a full member to Metre Convention.

Currently Kazakhstan published 51 rows CMC data in CMC database on the BIPM web site, as the result of participation in international comparisons of measurement standards.

The state service of reference substances and materials of composition and properties hosted by RSE “KazInMetr” have been performing since 2002; the state service of time and frequency and the state service of reference data of physical constants and properties of substances and materials have been performing since 2005.

Besides the State Metrology Service the national metrology infrastructure includes a number of organizations, accredited for calibration of measuring instruments, evaluation of measurement methods.

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

KYRGYZSTAN

Area: 198.5 thousand km²

Population: 5,224 million

Time zone: UTC+6

National currency: som

State management activities to ensure traceability in the country is regulated by **The Ministry of Economy of the Kyrgyz Republic (MEAP KR)** in accordance with the law of the Kyrgyz Republic “On ensuring the Unity of Measurements” and the Government of the Kyrgyz Republic No. 727 from 04.12.09.

The organizational structure of the National Metrology System consists of MERKR, Center for Standardization and Metrology and the State Inspectorate of metrological supervision.

The Ministry of Economy of the Kyrgyz Republic

Minister: Mr. Sariev Temir
Address: 106 Chui Avenue, 720002 Bishkek, Kyrgyz Republic
Telephone: +996 312 62 05 90
+996 312 62 37 54
Fax: +996 312 66 18 37
E-mail: mert@mert.kg

Major activities are as follows:

- development and implementation of State Policy on Ensuring Unity of Measurements;
- coordinate the activities of the Center for Standardization and Metrology;
- installation of measurement units permitted for use;
- establishment of procedures for the development and approval of documents to ensure unity of measurements;
- organization and implementation of the state Metrological Supervision of compliance requirements to ensure unity of measurements;
- accreditation of laboratories carrying out the calibration of measuring instruments.

Center for Standardization and Metrology under the Ministry of Economy of the Kyrgyz Republic (CSM)

Director: Mr. Alimbek Kurmanbaev

Address: 197 Panfilov Str., 720040 Bishkek, Kyrgyz Republic
Telephone: +996 312 62 68 70
+996 312 62 57 34
Fax: +996 312 66 13 67
E-mail: nism@nism.gov.kg
metrolog@nism.gov.kg
metr_kg@mail.ru

The basic activities include:

- establishment and development of a national legal metrology system. The purposes of this system are to maintain traceability of measurement results, secure public interests and encourage fair competitiveness between vendors;
- realisation and dissemination of base and derived units of the International System of Units (SI); development, maintenance and improvement of the national standards of physical quantities;
- rendering of verification (calibration) and measurement services to manufacturers and organisations having different ownership;
- type approval and metrological evaluation of measuring instrument; maintenance of the state register of approved measurement instruments and reference materials;
- participation in comparisons of measurement standards at international, regional and national levels for the purpose of their technical maintenance and worldwide recognition of the resulting calibration and measurements certificates;
- development and evaluation of measurement procedures;
- research in the field of metrology;
- participation in the activities of regional and international metrology organisations;
- Participation in Training and raising the level of skills of experts in metrology.

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

At the international level NISM cooperates with:

- International Organisation of Legal Metrology (OIML);
- Interstate Council for Standardization, Metrology and Certification (EASC);
- Interregional Standardization Association (IRSA);
- International Measurement Confederation (IMEKO);
- Euro-Asian Cooperation of National Metrological Institutions (COOMET).

The structure of the state metrological service also includes 9 regional metrological centers.

National Inspection to the Metrological Supervision under the Ministry of Economy of the Kyrgyz Republic (NIMS MEAP KR)

Department: Mr. Akhmatov Sultan
Address: Panfilov Str., 197
720040, Bishkek, Kyrgyz Republic
Phone: +996 312 66 01 17
+996 312 66 26 21
Fax: +996 312 62 57 15
E-mail: gimn@metronadzor.kg
www.metronadzor.kg

Main activities:

- the implementation in the Kyrgyz Republic a unified state policy in ensuring unity of measurements;
- protecting the interests of the state and citizens from the consequences of incorrect measurements;
- carries out the state metrological supervision:
 - the release, condition and use of measuring instruments, including reference materials and properties of substances (materials), compliance regulations in the area of traceability in the sphere of state regulation, which applies:
 - health, veterinary medicine, environmental protection;
 - to ensure the safety and traffic;
 - for trade transactions and mutual settlements between producer and consumer;
 - to operate in a mandatory technical regulation;
 - for the amount of goods disposed of in the commission trade, in order to determine the actual values of the mass, volume, flow or other variables and compliance with the realized number of these goods;
 - a number of packaged goods in packages of any kind in their packaging, sale and import in cases where the contents can't be changed without its breaking or deformation, and the mass, volume, length, area or other value indicating the number contained in the package goods are marked on the package.

The Ministry of Economy of the Republic of Lithuania (<http://www.ukmin.lt/web/en/>), according to the Law on Metrology, is responsible for the formation of metrology policy, coordination of uniformity of measurements in Lithuania, carrying out implementation of legal metrological regulation, as well as for exchange of information on notification of bodies with the other EU member states.

State Research Institute Center for Physical Sciences and technology (FTMC) performs the functions of a **National Metrology Institute**. FTMC together with the national standards laboratories from **LEI** and **VMC**, are authorised by the Government of Lithuania to develop and maintain national measurement standards.

The national standards laboratories create, maintain, use and improve national standards, assure assignment of reproduced measurement quantities, maintain international traceability in the fields allocated to them and represent Lithuania in the activities of international metrological organisations in the scope of their competence.

According to the Resolution of the Government of Lithuania No. 595 of 25 June 2014 *on the approval, maintenance and use of national measurement standards, and approval of the list of national measurement standards and national standard laboratories*, laboratories were authorized to develop and keep national standards. The development of national measurement standards is being performed in line with the aforementioned Resolution, as well as the needs and economical capabilities of Lithuania.

Verification and calibration of measuring instruments and standards is performed by the stock companies – Vilnius, Kaunas, Klaipėda, Šiauliai and Panevėžys Metrology Centres (MCs) and private accredited laboratories for calibration and testing of certain kinds of measuring instruments, which are appointed by the Ministry of Economy.

Accredited and designated by the Ministry of Economy bodies carries out metrological conformity assessment in respect of pre-packaged goods or measuring containers, affixes respective marks and (or) issue documents ascertaining conformity.

Notified bodies carry out conformity assessment activities according to the EU legislation.

The Lithuanian Metrology Inspectorate

(<http://www.metrinsp.lt/2/>) was established according to the Law on Metrology of Lithuania and performs the tasks of market surveillance for measuring instruments, which are under the metrological control, for prepackaged goods and measuring containers also for quantity of weighted, counted measured and dosed products.

At Kaunas University of Technology established the Institute of Metrology

(<http://metrologija.ktu.edu/>), whose tasks are organization, coordination and execution of research in the field of metrology, as well as training of specialists in metrology.

There is a Technical Committee “Metrology” within the Lithuanian Standards Board. It’s main responsibility is to draft written standards in the metrology field.

State Research Institute Center for Physical Sciences and technology (FTMC)

Director: Dr. Gintaras Valušis

Address: Savanorių avenue 231, LT-02300 Vilnius, Lithuania

Phone: : +370 5 264 9211

Fax: : +370 5 260 2317

E-mail: info@ftmc.lt

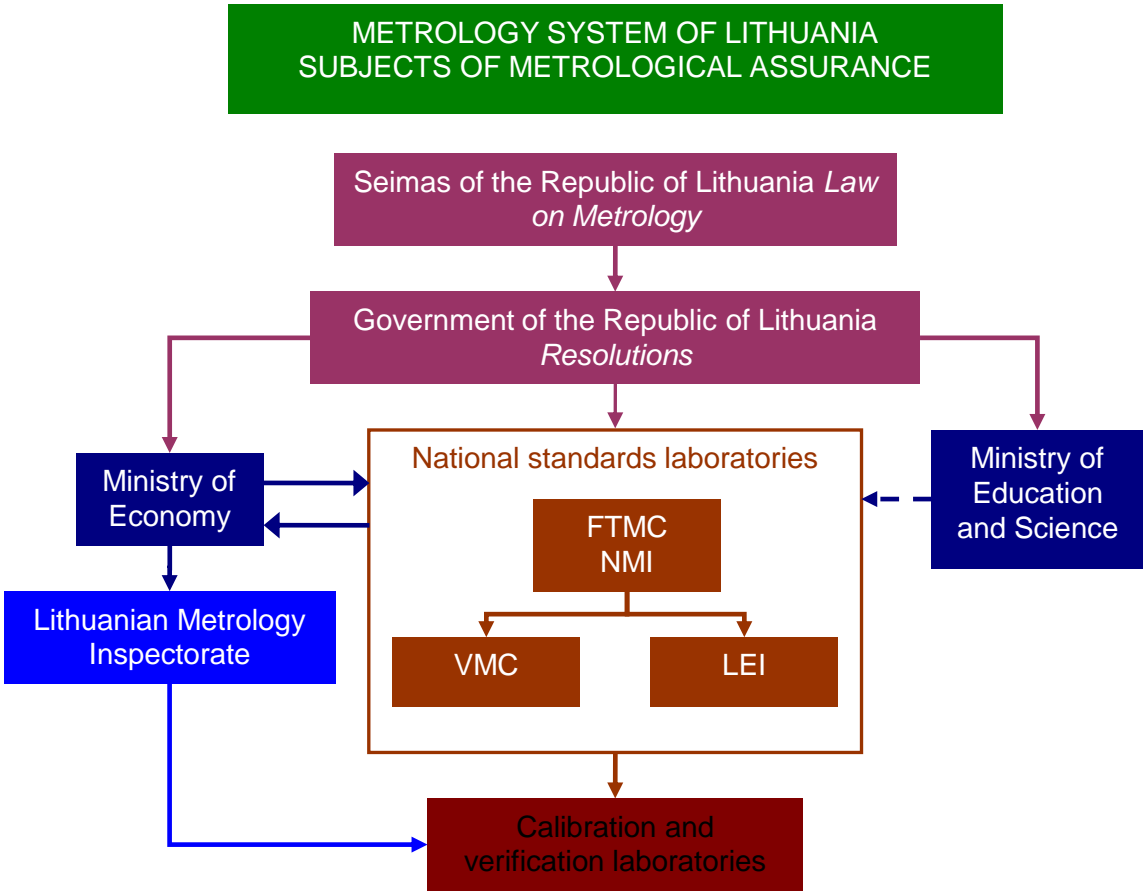

Website: www.ftmc.lt

FTMC, representing National Metrology Institute, resigned the Mutual Recognition Arrangement (CIPM MRA) on November of 2014. The first time CIPM MRA was signed by Lithuanian NMI in 2001. Three institutes FTMC; VMC and LEI were appointed to fulfill the requirements of the CIPM MRA in Lithuania.

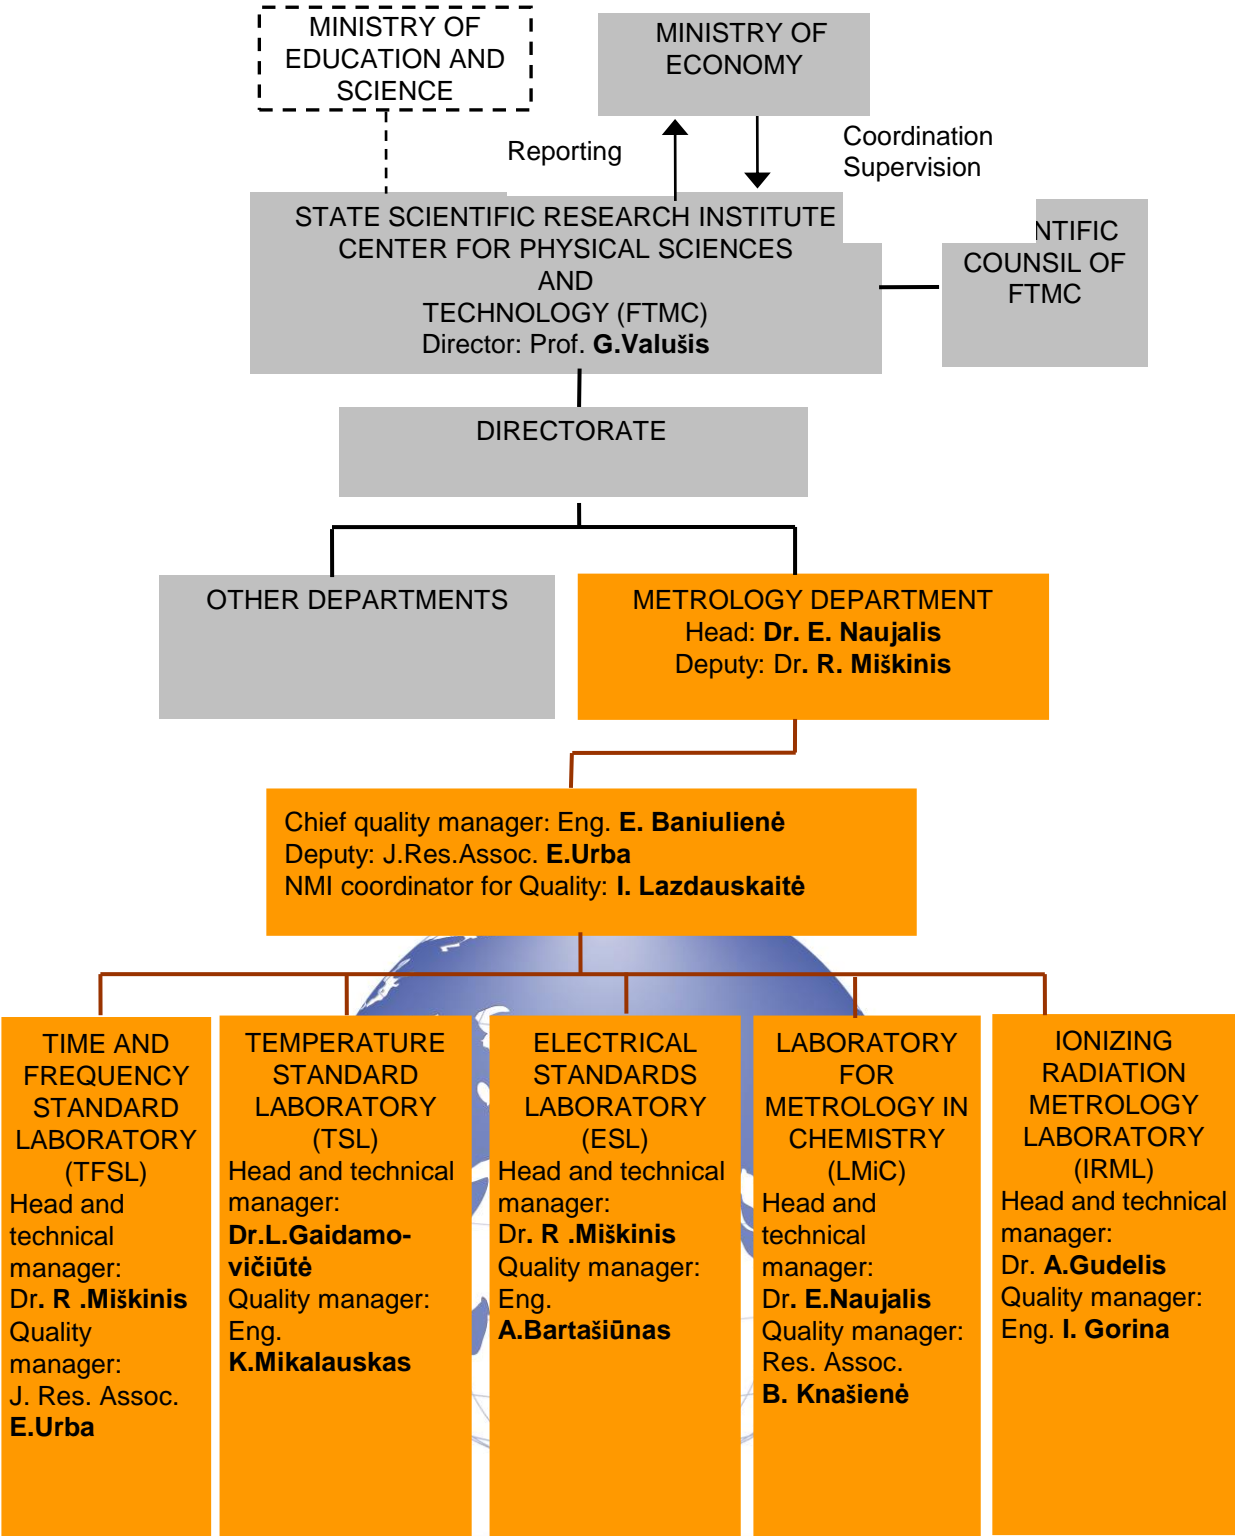

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

MOLDOVA

Area: 33.7 thousand km²

Population: 3.567 million

Capital: Chisinau

Time zone: UTC+2

National currency: MDL

In conformity with the law on metrology No. 647-XIII currently in force adopted on the 17th of November 1995 in the Republic of Moldova with the following amendments and addenda implemented by law of the Republic of Moldova No. 222-XVI from the 25th of October 2007 state governance providing the policy adoption in the domain of metrology is performed by the **Ministry of Economy** (Direction of metrology) that is the **Central Metrology Authority**.

In the domain of metrology the ministry is governed by law "On metrology", enactments of the President of the Republic, dispositions, orders, ordinances of the Government of the Republic of Moldova, international agreements and conventions signed by the Republic of Moldova.

The national system infrastructure of metrology includes:

- **Central Metrology Authority (CMA)** – central public administration branch body under Government, responsible for the quality infrastructure, - the Ministry of Economy
- Public Institution National Metrology Institute;
- National Standards Base;
- National Technical Council on Metrology;
- Agency for Consumer's Protection;
- Metrological departments of juridical persons.

Ministry of Economy performs the following functions:

- Elaboration and coordination in realization of state policy in the domain of metrology;
- Elaboration of legislative basis and taking part in elaboration and agreement of normative acts projects for the purpose of assurance of measurement results traceability to International System of Units (SI system);
- Affirmation of regulations in legislative metrology

within the competence;

- Maintenance of National Registries of the National System of Metrology (national measurements standards, legal metrology regulations and authorized entities);
- Coordination of metrological activity of the central public administration branch bodies, both juridical and individuals that accomplish activities in the domain of metrology;
- Represents the Republic of Moldova to regional and international organizations of metrology together with the national metrology institute;
- Designation of the juridical persons for verification of legal measuring instruments and for the carrying out official measurements on the basis of certificate of accreditations issued by the national accreditation body;
- Approval of training programs in the field of metrology, including trainings programs for experts in the field of legal metrology, technical experts in metrology and verification officers.

The Public Institution National Metrology

Institute is a legal entity and accomplishes its activity on the basis of regulations affirmed by Central Metrology Authority and by regulations and provisions of current law. The National Metrology Institute performs the following functions:

Functions on legal metrology:

- Development of legal metrology regulations harmonized with international and regional practices;
- Execution of technical works in the domain of legal metrology (type approval, primary, periodical and expert verifications of measuring instruments, official measurements, metrological examinations of the normative documents projects);

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

- Conduct of state measuring instruments registries, legal methodology of metering, regulations in legal metrology and parties registered in National Metrology System;
- Participation in work of international and regional forums in the domain of metrology together with CMA;
- Realization of agreements on mutual recognition of type approval and verification, technical competence of verification, testing laboratories and laboratories for calibration of measuring instruments and standard samples;
- Recognition of the results of metrological tests for EC type approval, EC verifications of measuring instruments, and the relevant certificates, realized in the European Union states – members;
- State registration of juridical persons fulfilling activities on repair, sale, rent and assembly of measuring instruments, and juridical persons who manufacture, import or package the products.

Functions on general metrology:

- Realization of national policy in the domain of metrology;
- Creation, development and maintenance of national and reference standards, storage and transmission of legal units;
- Assurance of measuring results traceability through comparison of national database of

standards on regional and international levels, maintenance of national and reference standards, storage and transmission of legal units;

- Training and professional development of experts in legal metrology, technical experts in metrology and verification officers;
- Elaboration and examination of the normative documents projects on assurance of measurements traceability, approved in metrological requirements with international and national documents of other countries.

Agency for Consumer's Protection was created in according with Government Decision number 936/31.07.2011, as a result of reorganization of Main State Inspectorate for Market Surveillance Metrology and Consumer Protection. Agency for Consumer's Protection is a juridical person having legislative functions of the metrological control and supervision over the national internal market.

Metrological departments of legal entities:

Metrological services of legal entities authorized by the national system of metrology to carry out works in the field of metrology, perform the functions of provisioning of unity and accuracy of the measurements by executing verifications of legalized measurement instruments or/and official measurements.

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

ROMANIA

Area: 237.5 thousand km²

Population: 2.5 million

Capital: Bucharest

Time zone: UTC+2

National currency: leu

The basic act establishing the national policy in the field of metrology is the Ordinance No. 20/1992 approved by the Law No. 11/1994. This document concerns the use of the units of measurement, the national system of measurement standards and the regime of the measuring instruments subject to the state metrological control.

The official body responsible for metrology in Romania is **the Romanian Bureau of Legal Metrology (BRML)**, a public institution, with non-budgetary financing, subordinated to the Ministry of Industry and Trade. BRML coordinates the metrology activities at the national level and supervises the compliance with the legal metrology regulations throughout the country.

FUNDAMENTAL METROLOGY

The National Institute of Metrology (INM), with laboratories in Bucharest and Timisoara, provides the maintenance and development of the national measurement standards, their comparison with international measurement standards and measurement standards of other countries, dissemination of the measurement units to secondary standards, higher echelon calibration services, scientific research in metrology and other related fields. INM is a research institute, part of the BRML structure, which is financed mainly through services paid by customers, but also through contracts financed by the Ministry of Research and Technology.

National Institute of Metrology (INM)

Director: Dr. Dragos Boiciuc

Address: 11 Sos. Vitan Bârzesti, 75669
Bucharest, Romania

Telephone: +40 1 334 55 20

Fax: +40 1 334 53 45

E-mail: office@inm.ro

The activity of INM covers the major part of physical quantities (dimensional, mechanical, electromagnetic, thermal, optical, physical-chemical, ionising radiation, etc.). The primary standards realised at INM are assessed by BRML and declared as national standards through governmental decisions.

INM also performs calibrations, metrological verifications, pattern and conformity tests, high accuracy measurements, certification of reference materials, international cooperation; offers consultations, education and training in metrology; prepares calibration/verification procedures and publishes the technical quarterly journal METROLOGIE.

APPLIED METROLOGY

The set of activities aimed at assuring traceability of all measurements in industry and other areas – also known as industrial or technical metrology – is carried out mainly in the regional metrology laboratories belonging to BRML and in the laboratories of enterprises and factories.

LEGAL METROLOGY

According to the legislation in force in the field of metrology, the measuring instruments used in areas of public interest, such as trade, health, environment protection, etc. are submitted to the metrological control of the state. This control is exerted mainly through the authorisation of metrology laboratories and their personnel, through pattern approval of measuring instruments manufactured in Romania or imported, through initial and subsequent metrological verifications and through metrological surveillance.

BRML issues orders and regulations in the field of legal metrology, performs inspections and applies sanctions, represents Romania in the international organisations of legal metrology.

Population: 145.2 million

Capital: Moscow

Time zone: UTC+3 – UTC+12

National currency: ruble

All activity on assuring the uniformity of measurements in Russia is based on the Law of the Russian Federation On Assuring the Uniformity of Measurements issued in 2010. Realisation of this Law, fulfilment of metrological functions and terms of reference are approved by Decrees of the President of the Russian Federation No. 314 of 9 March, 2004 and No. 649 of 20 May, 2004 and Government Directive No. 294 of 17 June, 2004 and are implemented by **the Federal Agency on Technical Regulation and Metrology (Rosstandart)** under the Federal Ministry of Industry and Energy (Minpromtorg of Russia).

Head of the Metrology Department:

Mr. Roman Rodin

Address: 9 Leninsky Prospect, 117049
Moscow, Russia

Telephone: +7 499236 75 60
+7 499236 30 42

Fax: +7 499236 62 31

E-mail: info@gost.ru, metrol@gost.ru

The State Metrology Service is a subsidiary of Rosstandart, which incorporates state scientific centres (research metrology institutes) and local metrology departments of different regions of Russia.

Rosstandart coordinates the work of the following:

- State Service of Time and Frequency and Determination of the Earth Rotation Parameters (SSTF);
- State Service of Reference Materials of the Composition and Properties of Substances and Materials (SSRM);
- State Service of Standard Reference Data of Physical Constants and Properties of Substances and Materials (SSSRD).

Rosstandart carries out state metrological surveillance and control over measuring instruments.

State regulation in the field of assurance of measurement uniformity is executed in the following forms:

- type approval of reference materials or type of measuring instruments;
- verification of measuring instruments;
- metrological expertise;
- state metrological supervision;
- attestation of measurement procedures (methods);
- accreditation of legal entities and self-employed entrepreneurs to perform work and (or) render services in the field of assurance of measurement uniformity.

The state metrological supervision shall include:

- observance of obligatory requirements in the field of state regulation of assurance of measurement uniformity to measurements, quantity units, and also to measurement standards of quantity units, reference materials, measuring instruments during their release from manufacture, import to the territory of the Russian Federation, sale and application in the territory of the Russian Federation;
- availability and observance of the certified measurement procedures (methods);
- observance of obligatory requirements to deviation of quantity of prepackaged products from the declared value.

International cooperation in the field of metrology is performed with the following organisations:

- International Organisation of Legal Metrology (OIML);
- International Bureau of Weights and Measures (BIPM);
- Euro-Asian Cooperation of National Metrological Institutions (COOMET);
- Asia-Pacific Legal Metrology Forum (APLMF);
- Interstate Council for Standardisation, Metrology and Certification (EASC);
- other international and regional organisations.

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

Metrology institutes of Russian Federation actively collaborate with national metrology centres of Germany, the USA, the United Kingdom, Slovakia, Japan, France, Korea, China, India, Belarus, Ukraine, Lithuania, etc.

A good deal of activity regarding the development, improvement, maintenance and use of national measurement standards, as well as research in the field of metrology including elaboration of normative documents of GSI is carried out by Metrology Institutes of Rosstandart. The majority of these institutes is specialised in specific fields of measurements and accredited as state test centres of measuring instruments and verification centres, as bodies on voluntary certification of measuring instruments and at the same time authorised to perform accreditation in the Russian System of Calibration (RSC).

All-Russian Scientific Research Institute of Metrology named after D.I. Mendeleev (VNIIM)

Director: Mr. Kirill Gogolinsky
Address: 19 Moscovsky Prospect, 190005
Sankt-Petersburg, Russia
Telephone: +7 812 251 76 01
Fax: +7 812 713 01 14
E-mail: info@vniim.ru

The institute is a successor of the Central Chamber of Measures and Weights, which was the first and one of the oldest world metrology institutions. It is also the biggest world research centre of metrology and leading Russian research organisation in the field of metrology that maintains national measurement standards and has an official status of the State Research Centre of the Russian Federation.

All-Russian Scientific Research Institute of Metrological Service (VNIIMS)

Director: Dr. Alexander Kuzin
Address: 46 Ozernaya Str., 119361
Moscow, Russia
Telephone: +7 495 437 55 77
Fax: +7 495 437 56 66
E-mail: office@vniims.ru

VNIIMS is the main centre of the State Metrology Service and a centre of measurement standards in

the filed of measurements of middle pressures, geometric parameters of machined surfaces and form deviations of rotating objects, high and ultrahigh voltages, etc.

It carries out research and engineering in the filed of scientific, applied and legal metrology. VNIIMS is a scientific-methodological centre of the Russian System of Calibration (RSC) and certification of measuring instruments. It also acts as a head organisation of Rosstandart of Russia in international cooperation and training and information resource in the field of metrology.

All-Russian Scientific Research Institute of Optical and Physical Measurements (VNIIOFI)

Director: Dr. Vladimir Krutikov
Address: 46 Ozernaya Str., 119361
Moscow, Russia
Telephone: +7 495 437 56 33
Fax: +7 495 437 31 47
E-mail: vniiofi@vniiofi.ru

VNIIOFI is a leading organisation on assuring the uniformity of measurements in the fields of photometry; radiometry (including laser radiometry); spectroradiometry and spectrophotometry; colorimetry; radiation pyrometry; sensitometry and densitometry; refractometry and polarimetry; measurements of the parameters of fibre-optics data transmission systems (FOTS); measurements of optical parameters of high-speed processes; measurements of pulse parameters of electric and magnetic fields.

VNIIOFI is designated as:

- head organisation in the field of measurements of optical and physical parameters and parameters of high-speed processes;
- head organisation for assuring the uniformity of measurements in public health and in manufacture of medical equipment;
- head organisation for assuring the uniformity of measurements in the field of non-destructive testing.

VNIIOFI takes part in the work of the Russian Committee on High-Speed Photography and Photonics, which includes leading scientists of Russian Academy of Sciences, experts of higher education system and industry.

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

The Ural Scientific Research Institute of Metrology (UNIIM)

Director: Dr. Sergey Medvedevskikh
Address: 4 Krasnoarmeyskaya Str., 620000,
Yekaterinburg, Russian Federation
Telephone: +7 3433 50 26 18
Fax: +7 3433 50 20 39
E-mail: uniim@uniim.ru

Scientific and methodological centre of the State Service of Certified Reference Materials for composition and properties of substances and materials, providing scientific and guidance support of the works and coordination of interstate and interbranch activities on the production, testing and implementation of certified reference materials with the aim of ensuring the uniformity of measurements on the basis of their use.

It carries out scientific research, develops measurement standards and certified reference materials for ensuring the uniformity of measurements of temperature and thermo-physical parameters, surface density and thickness of coatings, magnetic and electrical quantities, linear and angular parameters, deformation and force, mass, torque and mechanical power, pressure, humidity of solid substances, physical chemistry composition and properties of substances and materials.

Expert centre for accreditation in the areas of conformity assessment and ensuring the uniformity of measurements, Scientific and methodological centre for organization and holding interlaboratory comparison tests; Centre for testing and verification (calibration) of measurement instruments; Certification body for measurement instruments, certified reference materials and industrial products; Testing centre for nanoindustry substances, materials and products.

Quality Management System was recognized by COOMET Quality Forum as complying with the requirements of ISO/IEC 17025 and ISO Guide 34.

Siberian State Scientific Research Institute of Metrology (SNIIM)

Director: Mr. Gennady Shuvalov
Address: 4 Dimitrov Prospect, 630004,
Novosibirsk, Russia
Telephone: +7 383 210 08 14
Fax: +7 383 210 13 60
E-mail: director@sniim.nsk.ru

SNIIM is a centre of measurement standards of the parameters of electro-radio circuits at high and ultra high frequencies; electro-magnetic features of materials at high and ultra high frequencies; heavy loads; thermal torrents; minor lengths.

SNIIM maintains reference installation, which is a part of the equipment of the State Service of Time and Frequencies (SSTF) and the determination of the Earth rotation parameters.

All-Russian scientific research institute of flow measurement (VNIIR)

Acting Director: Mr. Vladimir Solovyev
Address: 7a, 2 Azinskaya Str., 420088,
Kazan, Russia
Telephone: + 7 843 272 70 62
Fax: + 7 843 272 00 32
E-mail: office@vniir.org

The institute is the main center in Russia in the field of metrological support of measurements of flow and amount of liquids and gases, the volume and weight (in flow) of liquids and gases, volume (capacity measure) fluids, fluid level and granular media, physico-chemical properties and composition of crude oil and petroleum products. Is the center of the state primary standards. It has the status of the State Scientific Metrological Center of Russia.

National Research Institute of Physicotechnical and Radio Engineering Measurements (VNIIFTRI)

General Director: Dr. Sergey Donchenko
Address: Mendeleevo, Solnechnogorsky
District, 141570, Moscow Region,
Russia
Телефон: +7 495 744 81 12
Факс: +7 495 944 52 68
E-mail: director@vniiftri.ru

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

VNIIFTRI with its regional branches is a national metrology institute, which maintains and operates national primary and secondary standards in various metrology areas such as time and frequency, long distances, positioning, radio frequency measurements, magnetism, low temperature and thermophysical properties, high pressure, hardness of metals, sound in air and water, electrochemistry (pH, ions, electrolytic conductivity), disperse parameters of aerosols, suspensions and powders, ionizing radiation and nuclear constants. The institute also develops acousto-optic methods of measurement and provides metrology solutions to construction industry needs.

VNIIFTRI has the status of a State Scientific Center of the Russian Federation; it serves as the Main Metrology Center for the State Service for Time, Frequency and Earth Orientation Parameters, supporting its operation in cooperation with other institutions.

VNIIFTRI has the following below mentioned branches:

VNIIFTRI East-Siberian branch (ESB)

Director: Dr. Victor Yegorov
Address: 57 Borodina Str., 664056, Irkutsk, Russia
Telephone: +7 3952 46 83 03
Fax: +7 3952 46 38 48
E-mail: director@niiftri.irk.ru,
office@niiftri.irk.ru

The East-Siberian Branch is a metrology centre responsible for providing the uniformity of measurements in astro-optical and satellite determinations of Earth Orientation Parameters. It is also a centre for time and frequency standards in the East Siberian region, national primary standards for the dielectric parameters of substances and materials, and the humidity of gases.

VNIIFTRI Far East branch (FEB)

Director: Dr. Yuri Lykov
Address: 65 K. Marks Str., 680000, Khabarovsk, Russia
Telephone: +7 4212 32 92 68
Fax: +7 4212 30 15 66
E-mail: director@dfvniiftri.ru,
dalstandart@dst.khv.ru

The Far-Eastern Branch is a regional metrology centre for time and frequency standards in the Far East. It is also involved in providing the uniformity of ultrasonic measurements in solids.

VNIIFTRI Kamchatka branch (KB)

Director: Dr. Vladislav Sobolev
Address: Russian Federation, 683002, Petropavlovsk-Kamchatsky, Severo-Vostochnoye highway, 30, P.O.Box 26
Phone: +7 4152 49 75 41
Fax: +7 415 2 49 75 48

The Kamchatka Branch is a regional metrology centre, which is part of the State Service for Time, Frequency and Earth Orientation Parameters.

The Central Scientific Metrology Centre of the State Service for Standard Reference Data on Physical Constants and Properties of Substances and Materials (CSMC “SRD”) was established on the basis of CSMC “SRD” Department which is a structural unit of Russian Scientific and Technical Centre of Information on Standardization, Metrology and Conformity Assessment (FGUP “Standartinform”).

Director of CSMC “SRD” Department:

Dr. Yuriy Mamonov
Address: Nakhimovskiy Prospect, 31, Building 2, 117418, Russian Federation, FGUP “Standartinform”
Телефоны: +7 (495) 225-61-87,
+7 (495) 332-56-14
Факс: +7 (495) 719-78-20
E-mail: mamonov@gostinfo.ru

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

CSMC “SRD” carries out:

- development and certification of standard reference data tables (SRD), and maintains a register of SRD tables;
- development and certification of SSSRD procedures and recommended reference data (RRD), and maintains tables of RRD and SSSRD procedures;
- development of software for the implementation of SRD tables and SSSRD procedures;
- development of data bases for the properties of substances and materials;
- information provision with certified reference data on the properties of substances and materials.

Center for Surface and Vacuum Research (NICPV)

Director: Prof. Dr. Pavel Todua
Address: 40/1 Novatorov Str., 119421,
Moscow, Russia
Telephone: +7 495 935 97 77
Fax: +7 495 935 96 90
E-mail: fgupnicpv@mail.ru

The major activities of NICPV are as follows:

- complex study of structure, physicochemical and mechanical surface properties of a solid body and thin films, characteristics of processes at the phase thresholds with the purpose to develop

high-accuracy measurement instruments and methods for controlling technological processes aiming at assuring the uniformity of measurements in future technologies including micro- and nanotechnologies;

- research in the field of fundamental metrology directed at the creation and improvement of methods and high-accuracy measuring instruments, development of physical principles and creation of reference base of a new generation;
- development of methods and instruments for disseminating physical units from current measurement standards to working instruments, development of special standards for assuring uniformity of measurement in micro-, opto-, nanoelectronics, nanotechnology, precise machine-building, instrument making, biotechnology and microbiology, genetic engineering, chemistry and chemical technology;
- development of high-accuracy measurement instruments in the field of geometrical, vibro-acoustic and physicochemical measurements.

NICPV carries out tests and quality surveillance of production in science intensive technologies and industries with the purpose of conformity assessment.

The research facilities of NICPV include standards and high-accuracy apparatuses for length measurement in micro- and nano-meter ranges.

1. The institution responsible for national and other measurement standards and the scientific metrology in Slovakia is the Slovak Institute of Metrology (SMU)

The Slovak Institute of Metrology (SMU) has been established in 1968 as a National Czechoslovak Institute of Metrology and has more than 47 years of experience. SMU fulfils tasks as the national metrology institution (NMI) for the Slovak Republic since 1st of January 1993. At the present time SMU is subsidised organization of the SOSMT. SMU realises research and development in metrology, ensures the tasks of international cooperation in metrology and represents the Slovak Republic in international metrology organisations, ensures the maintenance and international comparison of the national standards of the Slovak Republic and the traceability given to these standards, coordinates the procedures of national standards approval and certified reference materials and specify the tasks and competence of the Institute in legal metrology. (<http://www.smu.sk/>)

Director General: Mr. Arpad Gonda

Address: Karloveská 63, 842 55 Bratislava, Slovak Republic
Telephone: +421 2 602 94 491
Fax: +421 2 654 29 592
E-mail: gonda@smu.gov.sk

2. The institutions responsible for legal metrology are:

Slovak Office of Standards, Metrology and Testing (SOSMT) as the central steering body of the state administration in the field of metrology.

The main tasks and activities of the UNMS in the field of metrology are:

- elaboration and realisation of the state policy in metrology;
- preparation of legislative and legal rules (acts and decrees) referring to metrology, standardisation and testing;
- steering of metrology in the state in the scope given by the Act on Metrology, including subordinate metrology institutions (Slovak Institute of Metrology (SMU), Slovak Standards Institute (SUTN), Technical Testing Institute (TSU), Slovak Legal Metrology (SLM), Slovak National Accreditation Service (SNAS) and Slovak Metrology Inspectorate (SMI));
- methodical supervision of metrological activities.

(<http://www.unms.sk/>)

President of UNMS: Ms. Lucia Gocníkova

Address: Štefanovičova 3, P.O. Box 76, 810 05 Bratislava, Slovak Republic

E-mail: predseda@normoff.gov.sk

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

Slovak Legal Metrology (SLM), non-profit organisation, the SLM is charged with the following main activities:

- verification of legally controlled measuring instruments;
- calibration of reference and working standards for industry;
- calibration of ordinary measuring instruments for customers;
- carrying out of pattern evaluation of measuring instruments;
- carrying out of interlaboratory comparisons.

Legal basis of maintenance of unity of measurements and the state metrological system is Constitution of Republic of Tajikistan, Law of Republic of Tajikistan "About maintenance of unity of measurements" No. 435 from May, 15th, 1997 (changes and additions No. 321 from July, 30th, 2007, No. 467 from December, 31st, 2008), and also other regulatory legal acts of Republic of Tajikistan.

The metrological service of Republic of Tajikistan consists of the State metrological service and metrological services of legal bodies.

The state metrological service is headed by Agency Tajikstandard and includes in itself:

- Bodies of the State metrological service in Gorno-Badakhshansky autonomous region, republic areas, areas of republican submission and a city of Dushanbe.

The structure of the State metrological service includes 11 regional centers of Tajikstandard.

Activity on maintenance of functioning and development of the State metrological system carries out by **Agency on Standardization, Metrology, Certification and Trade Inspection under the Government of the Republic of Tajikistan (Tajikstandard)**.

Director: Mr. Bakhtiyor Shukurov
Address: 734018, Dushanbe, N. Karabaev Str., 42/2
Phone: +992 37 233 68 69
Fax: +992 37 234 19 33
E-mail: info@standard.tj

The competence of Tajikstandard concern:

- The organization of carrying out of basic researches in the field of metrology;

- The organization of creation and functioning of reference base;
- Definition of the general metrological requirements to means of measuring techniques, methods and results of measurements;
- The statement of types of measuring apparatuses;
- Definition of the general requirements concerning an order of carrying out of calibration and metrological certification of means of measuring techniques, working out of statutory acts, programs etc.;
- Inter-regional and inter-branch coordination of activity on maintenance of unity of measurements;
- Establishment of rules of creation, the statement, storage and application of the state standards of units of sizes;
- Definition of the general metrological requirements to means, methods and results of measurements;
- Realization of the state metrological control and supervision;
- A management of activity of the state metrological service and other metrological services of maintenance of unity of measurements;
- Participation in activity of the international metrological organizations.

The international cooperation of Tajikstandard in the field of metrology is carried out in frameworks:

- International Organization for Legal Metrology (OIML);
- Interstate Council for Standardization, Metrology and Certification (EASC);
- Inter-Regional Association for Standardization (IAS).

TÜBİTAK Ulusal Metroloji Enstitüsü (TÜBİTAK UME), as the National Metrology Institute of Turkey, is responsible for the establishment and maintenance of national measurement standards as well as research and development activities in scientific metrology in Turkey

TÜBİTAK National Metrology Institute (TÜBİTAK UME) is a research and development institute that operates under the umbrella of the Scientific and Technological Research Council of Turkey (TÜBİTAK), which is an affiliated institution of the Ministry of Science, Industry and Technology.

The institute aims to ensure the reliability of all measurements conducted in Turkey, to make provisions for the integration of these measurements into the international system and to develop existing and new measurement technologies, thereby establishing the national measurement system required for ensuring the accuracy of measurements used in commercial and industrial settings and which contributes to equity in national and international trade, increases in the quality of Turkish industrial products and enhances Turkey's scientific and technological development.

The main activities of TÜBİTAK UME can be summarized as follows:

- To establish and maintain national measurements standards in accordance with the SI Units.
- To ensure the traceability of national measurement standards to international standards and to disseminate traceability nationally through the provision of calibration services
- To support the other elements of the national measurement system through the provision of training, consultancy services, publications and other mechanisms and the organization of measurement inter-comparisons and proficiency

testing schemes.

- To produce and distribute certified reference materials to ensure the traceability of chemical measurements in Turkey
- To contribute to research and development in the areas of measurement techniques, calibration and measurement technologies at the international level.
- To represent Turkey at an international level in the field of metrology and to cooperate with international organizations and other national metrology institutes in order to fulfill the requirements of the Metre Convention and the CIPM Mutual Recognition Arrangement (CIPM MRA)

Under the terms of the CIPM Mutual Recognition Arrangement, TÜBİTAK UME has designated the Turkish Atomic Energy Agency (TAEK) to carry out the responsibility for establishing measurement standards and scientific metrology activities in the area of Ionizing Radiation. Similarly, the Marmara Research Center, Materials Institute - Underwater Acoustics Laboratory (MRC MI-UAL) has been designated in the area of underwater acoustics.

The General Directorate for Metrology and Standardization (GDMS) under the Ministry of Science, Industry and Technology (MSIT) is the authority for legal metrology in Turkey.

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

The General Directorate for Metrology and Standardization's duties were specified in the Decree Law on the Organization and Duties of the Ministry of Science, Industry and Technology published in the Official Gazette no. 27598 dated 08/06/2011. The general framework for legal metrology activities is provided by the Law No. 3516 on Measures and Standards that went into effect on 21/01/1989.

GDMS operates 7 regional metrology laboratories and 81 provincial verification bureaus. It is responsible for setting policy in the areas of legal metrology and standardization, specifying and applying mandatory standards and technical regulations in legal metrology and pre-packaging, conducting market surveillance and controls, designating and maintaining oversight of conformity assessment bodies and notified bodies in accordance with EU directives, control of measurement instruments used in trade, and the operation and supervision of public and private legal metrology laboratories. The practice of legal

metrology in Turkey has undergone significant change in recent years as technical regulations have been harmonized with the EU within the scope of the ongoing membership negotiations with Turkey. Within this context, the GDMS has been responsible for the implementation of the Non-Automatic Weighing Instruments and Measurement Instruments Directives (NAWI and MID) of the EU.

General Director of GDMS: Mr. Mehmet Karaoğlu

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

UKRAINE

Area: 603.7 thousand km²

Population: 45.8 million

Capital: Kyiv

Time zone: UTC+2

National currency: hryvna

The legal basis of the metrology system of Ukraine is the Law "On metrology and metrological activity".

The metrology system of Ukraine includes:

- National Metrology Service;
- legal and regulatory framework, including legislative acts, technical regulations and other legal and regulatory acts that govern the relations in the field of metrology and metrological activity;
- National Standards Base and the system of transferring the sizes of the units of measurement;
- system of voluntary accreditation of calibration laboratories, as well as the system of accreditation of testing laboratories and conformity assessment bodies;
- educational institutions, scientific and research institutions and organizations that disseminate knowledge and experience in the field of metrology and metrological activity.

The National Metrology Service includes:

- central executive body that ensures the formation of the state policy in the field of metrology and metrological activity;
- central executive body that realizes the state policy in the field of metrology and metrological activity;
- central executive body that realizes the state policy in the field of metrological supervision;
- scientific metrology centres;
- state enterprises in the field of the Ministry of Economic Development and Trade of Ukraine;
- State Service of Universal Time and Reference Frequencies;
- State Service of Reference Materials of Composition and Properties of Substances and Materials;
- State Service of Reference Data on Physical Constants and Properties of Substances and Materials;
- metrology services of the central executive

bodies, other state bodies, enterprises and organizations;

- bodies of conformity assessment of measuring instruments and verification laboratories.

All the activities on ensuring the functioning and development of metrology system are coordinated by the **Ministry of Economic Development and Trade of Ukraine**.

Minister of Economic Development and Trade of Ukraine: **Mr. Aivaras Abromavicius**

Address: 12/2 Grushevskogo Str., Kyiv, 01008, Ukraine

Telephone: +38 044 528 92 27

Fax: +38 044 528 90 14

E-mail: dtr@me.gov.ua, tnv@me.gov.ua

Web: www.me.gov.ua

One of the activities of the Ministry of Economic Development and Trade of Ukraine is to provide the development and realization of the state policy in the field of technical regulation (standardization, metrology, certification, conformity assessment (confirmation), accreditation of conformity assessment bodies, quality management), including:

- provision of statutory regulation in the field of metrology and metrological activity;
- organization of conducting the fundamental researches in the field of metrology;
- provision of maintenance and improvement of the National Standards Base;
- development or participation in the development of the state scientific and scientific-technical programs related to ensuring the uniformity of measurements;
- representation and participation of Ukraine in the activities of international, European and other regional metrology organizations;
- exercising of other powers established by the laws and imposed on it by the acts of the Cabinet of Ministers of Ukraine.

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

SCIENTIFIC METROLOGY CENTRES

National Scientific Centre “Institute of Metrology” (NSC “IM”)

General Director: Prof., Dr. . Pavel Neyezhmakov

Address: 42 Mironositskaya Str., Kharkiv-2,
61002, Ukraine

Telephone: +38 057 700 34 09

Fax: +38 057 700 34 47

E-mail: info@metrology.kharkov.ua

NSC “Institute of Metrology”:

- carries out the fundamental scientific and applied scientific researches in the field of metrology;
- participates in the development of state programs on metrology, concepts of these programs and the concept of development of metrology system in Ukraine;
- carries out the research and development works related to the creation, improvement, maintenance, comparison, use of the national standards, the establishment of the systems of transferring the sizes of the units of measurements (providing metrological traceability with account for the needs of the national economy and international experience);
- participates in the drafting of technical regulations of other legal and regulatory acts, as well as the normative documents in the field of metrology and metrological activity;
- performs functions of the Head Center of the Service of Universal Time and Reference Frequencies;
- performs functions of the scientific and methodological center of the Service of Reference Materials of Composition and Properties of Substances and Materials;
- coordinates the scientific and metrological activity related to the measurements and calculations of time in the territory of Ukraine;
- provides intersectional coordination and scientific-methodological support on works on the development and use of reference materials of composition and properties of substances and materials;
- performs the works on conformity assessment of legally regulated measuring instruments to the technical regulations in case of its appointment as a conformity assessment body;

- carries out the verification of legally regulated measuring instruments in operation according to the respective types and subtypes of measurements, which have internationally recognized calibration and measurement capabilities, and/or with the use of national standards, provided the empowerment to carry out the verification of the relevant measuring instruments;
- maintains and uses the national standards of the units of physical quantities in the types and subtypes of measurements assigned to it;
- carries out the calibrations of measuring instruments used in and/or out of the field of legally regulated metrology;
- carries out the measurements in the field of legally regulated metrology;
- develops measurement, verification and calibration techniques;
- provides the management of the information fund of national standards and reference materials appropriate for use in verification of legally regulated measuring instruments;
- provides cooperation with the international metrology organizations;
- ensures the activity of the national secretariats of international, intergovernmental and regional metrology organizations: CGPM, EASC, COOMET, EURAMET.

The State Enterprise “All-Ukrainian State Research and Production Center for Standardization, Metrology, Certification and Consumers' Rights Protection” (SE “Ukrmetrteststandard”)

The legal basis of the system for assuring the uniformity of measurements of the Republic of Uzbekistan (SAUM) was laid down in 1993 in the Law on Metrology and in the Directive of the Government of the Republic of Uzbekistan. The organizational structure of the SAUM is represented by:

- the State Metrology Service;
- metrological service of legal persons.

The State Metrology Service is headed by **Uzbek Agency for Standardization, Metrology and Certification ("UZSTANDARD" Agency)**.

General Director: Mr. Abdusalam Kurbanov

Address: 333"A" Farobiy Str., 100049,
Republic of Uzbekistan

Telephone: 998 71 242-94-93

Fax: 998 71 246-17-63, 246-18-20

E-mail: uzst@standart.uz

The state metrological service headed by "Uzstandard" Agency includes:

- the State Institution "Centre of National Standards of Republic of Uzbekistan";
- the State Enterprise "Centre of Metrological Services";
- Scientific Research Institute of Standardisation, Metrology and Certification;
- the Main Centre of Metrological Service;
- the Main Centre of Reference Materials;
- the Main Centre for Non-destructive Testing;
- territorial (Karakalpak, regional and city) administrations of standardisation and metrology.

Major branches of activities are as follows:

- maintenance of the common policy on the matters regarding the assurance of the uniformity of measurements, as well as

coordination of the implementation and development of the SAUM;

- development of legal and other directives aiming at assuring the uniformity of measurements; definition of priorities in improving metrology;
- organisation of the development and approval of national standards and other normative documents regulating the implementation of the SAUM;
- organisation of the publication and dissemination of normative documents and scientific-technical information in the field of metrology;
- type approval of imported and domestically produced measuring instruments;
- organisation and performance of metrological surveillance over measuring instruments and implementation of metrological directives pertaining to measurements in the field of distribution of the state metrological supervision and control;
- coordination of cooperation in the field of metrology and laboratory accreditation at the international level; representation of the Republic of Uzbekistan in the international metrology organisations and collaboration with national metrology of other countries.

The leading organisation in the field of developing and maintaining measurement standards is **the State Institution "Centre of National Standards of Republic Uzbekistan"**.

Director: Dr. Khikmat Makhmudov

Address: 333"B" Farobiy Str., 100049,
Republic of Uzbekistan

E-mail: nscenter@standart.uz

METROLOGY INFRASTRUCTURES OF COOMET MEMBER COUNTRIES

The major activities are as follows:

- coordination and performance of fundamental and practical research with the purpose of assuring the uniformity of measurements;
- development, maintenance and comparison of national measurement standards;
- reproduction of measurement units and their dissemination to measurement standards at the level of metrology services;
- development of a uniform scientific-technical policy in the field of metrology and assurance of the uniformity of measurements;
- development of normative and methodological documents in the field of metrology;
- carrying out of state type approval tests, state verification, calibration and metrological evaluation of measuring instruments and other metrology related work;
- maintenance of the state register of national and primary measurement standards;
- carrying out of metrological evaluation of measurement procedures;
- participation in the cooperation projects in the field of metrology at regional and international levels as a National Metrology Institute;
- participation in training and improving of professional skills of personnel engaged in metrology activities.

The structure of the State Metrology Service includes also metrological departments of **14 territorial administrations of standardisation and metrology and the Republican Centre of Tests and Certification.**

Scientific Research Institute for Standardization, Metrology and Certification (SRISMC)

Director: Dr. Karim Utaev

Address: 9 "B", Chopon Ota str., 100059,
Tashkent city,
Republic of Uzbekistan

Fax: 998 71 253 85 55

E-mail: info@smsiti.uz
smsiti@mail.ru

The major activities are as follows:

- rendering of the methodical help to the organization and perfection of metrological services of the enterprises and organizations, analytical laboratories, services of working out of standard samples and nondestructive inspection;
- working out of documents on the pattern approval of metrological attestation, checking of measuring instruments;
- attestation of methods for carrying out measurements, including working out of the necessary documents package;
- preparation of the analytical control services for accreditation;
- rendering of the methodical and practical help in working out and manufacturing of standard samples;
- metrological examination of normative and technical documents;
- examination of documents on imported standard samples for the purpose of their admission to application in Uzbekistan territory;
- marketing researches in the field of standard samples;
- preparation of the nondestructive inspection services for accreditation;
- attestation of nondestructive inspection techniques;
- independent, from the state metrological surveillance services, audit of a condition of metrological maintenance of manufactures and the enterprises.

3	COOMET PROGRAM TC 2 WORK PROGRAM for 2014 – 2015	<u>COOMET P3/2015</u>	
4	COOMET PROGRAM WORK PROGRAM of TC 4 “Information and Training” for 2015-2017	<u>COOMET P4/2015</u>	
5	COOMET PROGRAM PROGRAMME OF JOINT CRM DEVELOPMENT WITHIN COOMET (01.06.2014)	<u>COOMET P5/2014</u>	Project 186/RU/99

COOMET INFORMATIONAL MATERIALS

No.	Name of Informational Material	Registration Number	Remarks
1.	Normative Documents Regulating the Questions of RM Production and Use, Analytical Overview (based on information provided by COOMET contact persons for RM)	<u>COOMET I/RM/1:2001</u>	Project 185/RU/99
2.	Register of Certified Reference Materials of Composition and Properties of Substances and Materials Developed within COOMET	<u>COOMET I/RM/2:2014</u>	TC 1.12 Secretariat is maintaining and updating the Register
3.	Survey of Technical Requirements in the Field of Legal Metrology in COOMET Member Countries	<u>COOMET I/LM/3:2003</u>	
4.	Analysis of the Problem of Introduction of the Guide to the Expression of Uncertainty in Measurement in COOMET Member Countries	<u>COOMET I/GM/4:2005</u>	
5.	Analysis of Cooperation Projects within APLMF and Preparation of Proposals for Cooperation of COOMET with this RMO in the Field of Legal Metrology	<u>COOMET I/LM/5:2005</u>	Project 307/RU-a/04
6.	Review National Educational Systems in the Field of Metrology in COOMET Member Countries	<u>COOMET I/TR/6:2005</u>	

ADDITIONAL INFORMATION

COOMET COMMITTEE MEETINGS

No.	Date	Country and City	Participants (representatives of national, international and regional organisations)
1	13–14 November, 1991	POLAND (Warsaw)	BG, CS, CU, DE, HU, PL, RO, SU
2	2–3 June, 1992	POLAND (Warsaw)	BG, CS, CU, DE, HU, PL, RO, RU, UA
3	17–19 March, 1993	GERMANY (Berlin)	BG, BY, DE, PL, RO, RU, SK, UA, LT, BIML, EURAMET
4	19–20 April, 1994	SLOVAKIA (Bratislava)	BG, BY, DE, PL, RO, RU, SK, UA, LT, BIML
5	4–5 April, 1995	SLOVAKIA (Bratislava)	BG, BY, DE, PL, RO, RU, SK, UA, HU, CZ, BIPM, EURAMET, BIML
6	10–12 April, 1996	BULGARIA (Sofia)	BG, BY, DE, LT, PL, RO, RU, SK, UA, BIPM, BIML, EURAMET, WELMEC
7	23–25 April, 1997	GERMANY (Braunschweig)	BY, BG, DE, LT, PL, RO, RU, SK, UA, MD, EE; BIML, EURAMET, WELMEC
8	12–13 May, 1998	BELARUS (Minsk)	BY, BG, DE, LT, MD, PL, RU, SK, UA BIPM, STC
9	12–13 May, 1999	RUSSIA (Moscow)	BY, BG, DE, KZ, LT, MD, PL, RU, SK, UA
10	25–26 May, 2000	KAZAKHSTAN (Almaty)	BY, DE, KZ, KG, CU, MD, PL, RU, SK, UA, YU, UZ
11	25–26 April, 2001	MOLDOVA (Chisinau)	BY, DE, KZ, KG, LT, CU, MD, RU, RO, SK, UA
12	6–7 May, 2002	CUBA (Havana)	BY, DE, LT, CU, RU, RO, SK, UA; BIML
13	29–30 April, 2003	UKRAINE (Yalta)	BY, BG, DE, KP, LT, CU, MD, RU, SK, UA
14	27–28 May, 2004	BULGARIA (Albena)	BY, BG, DE, KZ, KP, LT, CU, MD, RU, UZ, UA; BIML
15	8–9 September, 2005	LITHUANIA (Vilnius)	BY, BG, DE, LT, MD, RU, SK, UZ, UA
16	4–5 September, 2006	GERMANY (Braunschweig)	BY, BG, CZ, DE, GE, KG, KZ, LT, MD, RU, SK, UA, UZ; CIPM, OIML, BIML, APMP, EURAMET
17	24–25 April, 2007	BELARUS (Minsk)	AM, AZ, BY, BG, DE, GE, KG, KZ, LT, RU, SK, UA, UZ; BIPM, BIML, EURAMET, WELMEC, APMP, EASC
18	15–16 May, 2008	UKRAINE (Kharkov)	AM, AZ, BY, CU, DE, KZ, MD, RU, SK, UA, UZ; BIML, EURAMET
19	20–21 May, 2009	AZERBAIJAN (Baku)	AZ, BY, BG, CU, DE, GE, KG, LT, MD, RU, SK, UA, UZ; BIML, EURAMET, NCSLI, WELMEC
20	21–22 April, 2010	KAZAKHSTAN (Astana)	AZ, AM, BY, KG, KZ, LT, RU, SK, TJ, UA, UZ; APMP
21	27–28 April, 2011	ARMENIA (Yerevan)	AM, BY, CU, DE, GE, KG, KZ, LT, MD, RU, RO, SK, UA, UZ; CIML, BIML, BIPM, WELMEC
22	18–19 April, 2012	KYRGYZSTAN (Cholpon-Ata)	AZ, AR, BY, DE, GE, KZ, KG, LV, RU, SK, TJ, UZ, UA, BIML, BIPM, EURAMET, APMP
23	5–6 July, 2013	RUSSIA (Nizhny Novgorod)	AZ, AR, BA, BY, DE, HR, KG, KZ, LT, MK, RU, SK, TJ, UZ, UA, BIML, BIPM
24	16–17 April, 2014	RUSSIA (Ekaterinburg)	AZ, AR, BY, DE, KG, KZ, RU, SK, TJ, TQ, UZ, UA, BIML, BIPM
25	27–28 May, 2015	TAJIKISTAN (Khujand)	AZ, AR, BY, DE, GE, KZ, KG, MD, RU, TJ, TR, UZ, UA, CH, USA, BIML, BIPM

COUNTRY CODES

AM – Armenia
 AZ – Azerbaijan
 BG – Bulgaria
 BY – Belarus
 CH – China
 CU – Cuba
 CS – Czechoslovakia
 CZ – Czech Republic

DE – Germany
 EE – Estonia
 GE – Georgia
 HU – Hungary
 KG – Kyrgyzstan
 KP – DPR of Korea
 KZ – Kazakhstan
 LT – Lithuania

MD – Moldova
 PL – Poland
 RO – Romania
 RU – Russia
 SK – Slovakia
 TJ – Tajikistan
 TQ – Turkey
 UA – Ukraine

US – USA
 UZ – Uzbekistan
 YU – Yugoslavia

Acronyms for the names of the NMIs of COOMET Member Countries

Agency "UZSTANDARD" "AZSTANDARD" Committee	Uzbekistan Azerbaijan	Uzbek Agency for Standardisation, Metrology and Certification State Committee for Standardization, Metrology and Patent of the Republic of Azerbaijan
BAM	Germany	Bundesanstalt für Materialforschung und –prüfung
BelGIM	Belarus	Belarussian State Institute of Metrology
BIM	Bulgaria	Bulgarian Institute of Metrology
BRML	Romania	Romanian Bureau of Legal Metrology
CENTIS	Cuba	Center of Isotopes
CJSC "NIM"	Armenia	Closed Joint Stock Company "National Institute of Metrology"
CIM	DPR of Korea	Central Institute of Metrology
CPHR	Cuba	Center for Protection and Hygiene of the Radiations
CRMS	Uzbekistan	Center for Rendering of Metrological Services
CSM	Kyrgyzstan	Center for Standardization and Metrology under the Ministry of Economy of the Kyrgyz Republic
CSMC "SSSRD"	Russia	Central Scientific Metrological Centre for Standard Reference Data
DAkKS	Germany	Deutsche Akkreditierungsstelle GmbH
DG MMI	Bulgaria	General Directorate "Measures and Measuring Instruments"
DG MSv	Bulgaria	Directorate General "Metrological Supervision"
DG NCM	Bulgaria	General Directorate "National Centre of Metrology"
DKD	Germany	(former) Deutscher Kalibrierdienst
DP "Ivano-Frankivskstandart-metrologija"	Ukraine	State enterprise "Ivano-Frankivsk Research-and-Production Center for Standardization, Metrology and Certification"
DP NDI "Systema"	Ukraine	State Enterprise "Scientific Research Institute for Metrology of Measurement and Control Systems"
FTMC	Lithuania	State Scientific Research Institute Center for Physical Sciences and Technology
GEOSTM	Georgia	Georgian National Agency for Standards and Metrology
Gosstandart of Belarus	Belarus	State Committee for Standardization of the Republic of Belarus
IMBIH	Bosnia and Herzegovina	The Institute of Metrology of Bosnia and Herzegovina
INIMET	Cuba	National Research Institute on Metrology
INM	Romania	National Institute of Metrology
INSM	Moldova	National Institute of Standardization and Metrology
ISTL	Ukraine	International School of Technical Legislation and Quality Management
KTU MI	Lithuania	Metrology Institute at Kaunas Technology University
LEI	Lithuania	Lithuanian Energy Institute
LMET	Germany	Thuringian State Bureau for Metrology and Verification
MEMST	Kazakhstan	The Committee of Technical Regulation and Metrology of the Ministry of Industry and New Technologies of the Republic of Kazakhstan
NC	Cuba	Cuban National Bureau of Standards
NICPV	Russia	Center for Surface and Vacuum Research
NIMS MEAP KR	Kyrgyzstan	National Inspection to the Metrological Supervision under the Ministry of Economy of the Kyrgyz Republic
NSC "IM"	Ukraine	National Scientific Centre "Institute of Metrology"
MEAP KR	Kyrgyzstan	The Ministry of Economy of the Kyrgyz Republic

Acronyms for the names of the NMIs of COOMET Member Countries

PI NMI	Moldova	Public Institution National Metrology Institute
PTB	Germany	Physikalisch-Technische Bundesanstalt
Rosstandart	Russia	Federal Agency on Technical Regulation and Metrology of the Russian Federation
RSE “KazInMetr”	Kazakhstan	Republic State Enterprise “Kazakhstan Institute of Metrology”
SAMTS	Bulgaria	State Agency for Metrological and Technical Surveillance
SAQM	DPR of Korea	State Administration for Quality Management
SE “Ukrmetrteststandard”	Ukraine	State Enterprise “All-Ukrainian State Scientific and Research Centre of Standardization, Metrology, Certification and Consumer Protection”
SI “CNS Uz”	Uzbekistan	The State Institution “Centre of National Standards of Republic of Uzbekistan”
SKS RSE “KazInMetr”	Kazakhstan	South-Kazakhstan Subsidiary of Republic State Enterprise “Kazakhstan Institute of Metrology”
SLM	Slovakia	Slovak Legal Metrology
SMI	Slovakia	Slovak Metrology Inspectorate
SMU	Slovakia	Slovak Institute of Metrology
SNAS	Slovakia	Slovak National Accreditation Service
SNIIM	Russia	Siberian State Scientific Research Institute of Metrology
SRISMC	Uzbekistan	Scientific Research Institute of Standardization, Metrology and Certification
SUTN	Slovakia	Slovak Standards Institute
Tajikstandard	Tajikistan	Agency on Standardization, Metrology, Certification and Trade Inspection under the Government of the Republic of Tajikistan
TSU	Slovakia	Technical Testing Institute
TUBITAK UME	Turkey	National Metrology Institute
UNIIM	Russia	Urals Scientific Research Institute of Metrology
UNMS	Slovakia	Slovak Office of Standards, Metrology and Testing
VMC	Lithuania	Vilnius Metrology Centre
VNIIFTRI	Russia	All-Russian Scientific Research Institute of Physico-Technical Measurements
VNIIFTRI ESB	Russia	East-Siberian branch of the National Research Institute of Physicotechnical and Radio Engineering Measurements
VNIIFTRI FEB	Russia	Far East branch of the National Research Institute of Physicotechnical and Radio Engineering Measurements
VNIIFTRI KB	Russia	Kamchatka branch of the National Research Institute of Physicotechnical and Radio Engineering Measurements
VNIIM	Russia	All-Russian Scientific Research Institute of Metrology named after D.I. Mendeleev
VNIIMS	Russia	All-Russian Scientific Research Institute of Metrological Service
VNIIOFI	Russia	All-Russian Scientific Research Institute of Optical and Physical Measurements
VNIIR	Russia	All-Russian Scientific Research Institute of Flowrate Measurement
WKS RSE “KazInMetr”	Kazakhstan	Western-Kazakhstan Subsidiary of Republic State Enterprise “Kazakhstan Institute of Metrology”

Acronyms for the names of international and regional metrology organizations

AFRIMETS	Intra-African Metrology System
APLMF	Asia Pacific Legal Metrology Forum
APMP	Asia Pacific Metrology Programme
BIML	International Bureau of Legal Metrology
BIPM	International Bureau of Weights and Measures
CODATA	Committee on Data for Science and Technology
EA	European Cooperation for Accreditation
EASC	Euro-Asian Council for Standardization, Metrology and Certification
EURAMET	European Association of National Metrology Institutions
IEC	International Electrotechnical Commission
ILAC	International Laboratory Accreditation Cooperation
ISO	International Organisation for Standardization
JCRB	Joint Committee of Regional Metrology Organisations and BIPM
NCSLI	National Conference of Standards Laboratories International
OIML	International Organisation of Legal Metrology
SIM	Inter-American Metrology System
STCMetr	Scientific & Technical Commission on Metrology of Euro-Asian Council for Standardization, Metrology and Certification
WELMEC	Western Europe Legal Metrology Cooperation
