| AGREED PROJECT COOMET | | |
| 1 Ref. №: 518/UZ-a/11 | | 2 Subject field: Information and Training |
| 3 Field of cooperation Consultations and training | | |
| 4 Partners: NIISMS, Republic of Uzbekistan, Agency “Azstandart”, Republic of Azerbaijan, NSC “Institute of Metrology”, Ukraine, International School of Technical Legislation and Quality Management (ISTL), Ukraine; SMU, Slovakia; National institute for standardization and metrology, Moldova; BelGIM, Belarus and other interested COOMET countries | | |
| 5 Subject: Training of specialists of measuring, calibration and testing laboratories | | |
| 6 Description: Application of modular approach in training on the base of step-by-step implementation of uncertainty conception into the practice of laboratory work. There are developed 9 training modules with application of system approach in distribution of functional module load (from basic to specialized). Such approach allows to train laboratory specialists of different qualification and to include into the training programs practical aspects of laboratory work in accordance with the requirements of ISO/IEC 17025 standard. | | |
| 7 Additional remarks: Training with application of module approach has been conducted since 2006. During this time more than 300 specialists from Kazakhstan, Azerbaijan, Uzbekistan, Russia, Ukraine have been trained. Place of conducting training is determined on agreement of interested parties. All course-modules are provided with methodical developments as tutorials, exercise books, slides, examination tests and exercises | | |
