

PROPOSED PROJECT COOMET		
1 Ref. No.: 553/UZ/12		2 Subject field: Information and Training
3 Field of cooperation Consultations and training		
4 Partners: NIISMS, the Republic of Uzbekistan; NSC "Institute of Metrology", Ukraine; International School of Technical Legislation and Quality Management (ISTL), Ukraine, and other interested countries of COOMET.		
5 Subject: The development of competencies and qualifications within COOMET for specialists and metrologists of measurement, calibration and testing laboratories on the basis of the modular approach.		
6 Description: This paper, based on the provisions of ISO/IEC 17025 and guidance documents of COOMET establishes the basic principles of qualification requirements for specialists and metrologists of measurement, calibration and testing laboratories. The basic training programs for specialists and metrologists of measurement, calibration and testing laboratories are programs based on modular approach for training. The competence of a specialist is assessed by means of qualification tests.		
7 Additional remarks: Modular approach has been used for training since 2006. During this time more than 500 specialists from Kazakhstan, Azerbaijan, Uzbekistan, Russia, and Ukraine have been trained.
